Summary

General Information

This science workbook by New Readers Press is available in both English and Spanish. It is a stand-alone workbook, although there is a Social Studies for the GED® Test workbook with a similar format.

The publisher lists the reading level of this workbook as 9+.

Organizational Format

The workbook is divided into three units, each made up of a varying number of lessons; each unit has a unit practice test. There is no pretest; however, there is a science practice test after the last unit practice test. Answers and brief explanations are provided in the back of the workbook.

The Unit topics are:

- Unit 1: Life Science: 5 Lessons
- Unit 2: Physical Science: 3 Lessons
- Unit 3: Earth and Space Science: 3 Lessons

Lesson Overview

The lessons in each unit vary in length, with a range of about five to eight pages. The lessons use various presentation modes: text, charts, diagrams, graphs, etc. At the end of each lesson, there is a section called Guided Practice, which provides two to three questions, primarily in a multiple choice format. After each question, there is a section labeled Think It Through, which guides the student via hints. There are no additional lesson questions beyond those in the guided practice.

Question/Answer Format

Most questions are multiple choice or short answers. The answer key includes brief explanations.

Standards Alignment

New Readers Press provides correlation between the workbook lessons (identified by pages) with the GED® Science Standards and the correlation with CCRS Reading Level E standards (identified by units).
