

Donation Method:

We hope that you will consider donating seeds that you've had success growing in the Northeastern climate. While packeted seeds from seed companies can be great, we are excited to receive locally adapted seeds in this seed library.

1. Place seeds in a container that fits into a jar/envelope that fits into the seed library drawers.
2. Place this container in the proper container (flowers in the flower drawer, etc.)
3. Record your donation in the donor log on the following page.
4. *Thank you!*
