Title: Designing Cities for a Warmer World

Description:

As the climate shifts into a new normal, plenty of questions are being asked about the state of urban planning around the world. Mainly: how can we better adapt our cities to climate change? What does it mean to create a climate-resilient city? This episode, Senior Producer Teresa Carey is joined by Jesse M. Keenan, an expert in climate adaptation and sustainable urban development, to discuss how we can adjust the current systems in place to better address climate change.

Dr. Samantha Yammine also digs into the exciting world of keratin toothpaste and a new study that explores honesty in science communication.
