8	15-08-2024	Under the Work Order Module →WO → Edit WO →more -> Check List is too many, it loading for quite some time and lagging	Tamim	Yes			Optimized the checklist steps and finalized the screen timing to a maximum of 3 to 4 seconds, which is now acceptable. Also, improved the API retrieval speed.		Done	Sekhar	
9	13-03-2025	Standardize Mobile alert pop-up boxes into five types (Success- Green Color, Error/SQL/API-Grey Color, Alert- Yellow Color, Info- Blue Color, and Question- Light Red)	YS WU	Yes			The mobile alert pop-ups have been standardized into five distinct types based on response categories. Each alert type now has a unique color, concise reworded messages, and improved usability across the application.		Done	Sekhar	
10	24-03-2025	Under the Work Order Module > Work order list > edit wo > More > comments > to allow scroll in any area even not point to the message. 	YS WU	Yes			Update the UI/UX Not detecting touch gestures on empty spaces. ✔ Allows scrolling even when tapping empty spaces ✔ Prevents the keyboard from blocking the scroll ✔ Dismisses the keyboard when clicking outside a message		Done	Sekhar	
11	01-05-2025	Approve work request screen. The number of WO is zero but still green.	YS WU	Yes			The issue was due to incorrect conditional logic on the frontend, which caused the status to appear green even when the work order count was zero.		Done	Sekhar

24	18-11-2025	Issue Transaction(MR) (Duplicate) when performing a transaction issue. Under the Inventory Module > Issue Transaction(MR) > When the user taps the Issue button twice, the system processes the transaction twice. This results in duplicate entries and negative values being inserted into the database. Back-end Data Update Issues fields are not being saved correctly during the issue process: ● Itm_trx_mtlrq_n_lineno is not being inserted. ● itm_trx_remark is being saved as an empty string instead of NULL (or the expected value). ● itm_mtu_po_costcenter is being saved as NULL. ● itm_mtu_po_account is being saved as NULL.	Izzat/vermi	Yes	update_stock_issue.php		Frontend Fix ● Disable the Issue button immediately on first tap. ● Use a state flag (clickedOnce = true) and prevent re-triggering until the API returns success or error. ● Fix Missing or NULL Values in Backend Update		Done	Sekhar	
25	18-11-2025	Issue Transaction(WO) (Duplicate) when performing a transaction issue. Under the Inventory Module > Issue Transaction(WO) > when the user taps the Issue button twice, the system processes the transaction twice. This results in duplicate entries and negative values being inserted into the database. Back-end Data Update Issues fields are not being saved correctly during the issue process: ● Itm_trx_mtlrq_n_lineno is not being inserted. ● itm_trx_remark is being saved as an empty string instead of NULL (or the expected value).	Izzat/vermi	Yes	update_stock_issue_by_wo.php		Frontend Fix ● Disable the Issue button immediately on first tap. ● Use a state flag (clickedOnce = true) and prevent re-triggering until the API returns success or error.		Done	Sekhar
