Abstract

The Abstract is written in English using Times New Roman 10 pt with single line spacing, one paragraph, aligned justifying, and a maximum of 300 words. The abstract must at least contain brief background, objectives, theory, methods, results and conclusions, and not contain tables, figures, references, abbreviations/acronyms and mathematical equations. The keywords used are a maximum of 5 words, classified by the first word of the alphabet on the first word, and separated by commas.

1. INTRODUCTION

The manuscript must be written in English and formatted on A4-size paper (21.0 × 29.7 cm) with 2 cm margins on all sides, and it should not exceed 15 pages. The text must be typed in Times New Roman, 11-point font size, with 1.15 line spacing. The manuscript should be submitted as a Microsoft Word (.docx) file, strictly following the provided template. Each paragraph should be indented 1.5 cm (or 1.5 tab) from the left margin, with 6 pt spacing before and 0 pt spacing after. Additionally, the manuscript must include distinct headers for the first page, odd pages, and even pages, as specified in the template. The manuscript must have a Turnitin similarity score of $\leq 20\%$ (excluding references and properly cited quotations).

Introduction section at least provides background, research rationale, and research objectives. The Introduction section should be supported by literature or previous research which can be used as a basic idea in determining solutions to the problem as well as to show the limitations of previous research.

The introduction generally consists of a statement about theme or topic of the study; summary of available literatures and cites the most important studies that are relevant to the current research; statement about controversies, gaps, inconsistencies in the literature that the current study will address; statement about problems or questions to be addressed in the study or objectives of the study. You can also state at the end of the introduction outline of the structure of the rest of the.

2. METHODS

The research method contains explanations in the form of paragraphs about the research design or descriptions of the experimental settings, data sources, data collection techniques, and data analysis conducted by the researcher. These methods contain how data is analyzed, theories that support problem solving, definitions, axioms, simulations and others.

3. RESULT AND DISCUSSION

In this section, the research results must be explained clearly and concisely. Results should be able to answer the main problems and obtain solutions to reach objectives contained in the introduction section. Data

that has been processed is presented in the form of tables, graphs, diagrams, images accompanied by clear explanations.

3.1 Subsection

The separation between main headings, sub-headings and sub-subheadings must be numbered in the manuscript, for example as follows:

3.2 Mathematical Equation

Mathematical equations are placed in the middle position (*centered*) using Times New Roman font for Text, Function and Variable. Each equation is numbered sequentially in the format (1), (2),.. and so on, and is aligned right as follows:

$$f(x; \theta, k) = \frac{1}{\theta^k \Gamma(k)} x^{k-1} e^{-x/\theta} \quad (1)$$

Vectors are written in bold and italics, for example $\mathbf{a} \times \mathbf{b}$. Writing variables with indexes must be *italic*.

3.3 Figures and Tables

3.3.1 Figures

All figures must be provided with figure captions and have sufficient and clear image resolution. The use of color in the image is not limited and the figure position is in the center and below the figure. The caption for the image begins with the words 'Figure' in bold with the first letter in capitals then followed by a number ending with a dot and the figure caption, for example **Figure 1.**, **Figure 2.**, and so on. Figure captions without ending with a dot. For more details, see the following example.

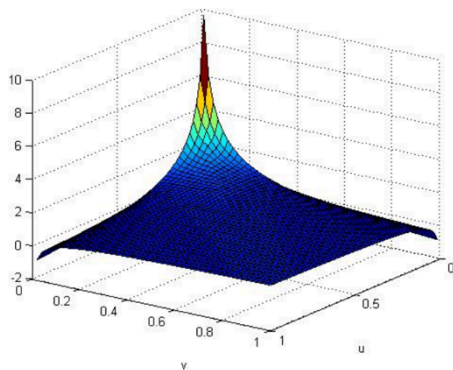

Figure 1. Use capital letters only at the beginning of figure names

3.3.2 Tables

All tables must be provided with a table description. The position of the table description is in the center and above the table. The words 'Table' in *bold* with the first letter capitalized then followed by a number ending with a dot and the table caption, for example **Table 1.**, **Table 2.**, and so on. The font size for the table contents is 10 pt Times New Roman. Table captions without ending with a dot. For more details, see the following example.

Table 1. Value of AIC

Orde	AIC
[2]	-9,381129
[3]	-9,15355

4. CONCLUSIONS

Write down the conclusions of the research briefly without new interpretation. It also can explain the advantages and limitations, and recommendations of the research.

5. ACKNOWLEDGMENTS

This section include gratitude to other contribution that support or involved in the research

6. REFERENCES

References at the end of the manuscript must be written according to the following example.. Cite only items that you have read. Please use Reference Manager Applications like EndNote, Mendeley, Zotero, etc. All publications cited in the text must be included as a Bibliography in IEEE format. For citations of references, we prefer the use of square brackets and consecutive numbers. The following bibliography provides a sample reference list with entries for journal articles [1]–[3], proceeding article [4]–[6], thesis or dissertation [7], books [8]–[10], website [11], and Book Section [12].
