

I NEED GEOGRAPHY CYPHER

Produced and made by D Wizzle

© Levitatin Devin, ForShower, Tiny Little Asian, McWizzle, Mr. Coleman/The Cole Weiser

I need geography
I need all that topography
And I ain't got no misogyny
For AP human geography

If its AP then I need it
If it's not than I delete it
My addiction, i need to feed it
If not i'm going to bleed it

I need geography
Cause this ain't no biography
And i ain't got no misogyny
For AP human geography

I never knew it existed
I immediately enlisted
I'm totally not twisted
I don't need any assistance

I need geography
Cause I hate mahogany
And I ain't got no misogyny
For AP human geography

(switch into **Levitatin' Devin's** poem)

I love agriculture
It's torture when I don't sing about it
Agriculture is the best culture
Some people call it a barbaric culture
Hovering around me like a vulture

I enjoy cultivating plants

It's hilarious to see their faces
When they see how fast I advance
There's a slim chance that they get out of their trance
And join me in the dance with plants
I enjoy cultivating plants

(switch into Fo' Showen)

Yeah, the AP humans, they got all the geography
The agriculture creates all the broccoli
I love growing crops I'm a master of farmery
Yeah, agriculture
It's always been my favorite culture
I love crops....

(fade out into TLA and MCWizzle)

I never knew that I needed this
I lied and lied and I cheated this
I died and revived when I proceeded this
Competition growin' in I weeded this

I love wood it keep me awake
It's also really good to bake
I Listen to drake

Growin' all this wheat in my noble steed
(Mr. Coleman interjects, "please don't grow wheat in my classroom")
Too bad old man
You can't stop me
Cause i'm the MC!

(Immediately switch into Mr. Coleman)

Don't talk back to me "MC"
I smell like sea breeze while you smell like old cheese
You can't stop my rhymes cause their automatic
Now step aside cause I am DIPLOMATIC

(Enter D Wizzle)

Why are we fighting? This is about AP Human Geography!
More specifically agriculture like...

(puts on reading glasses)

How LDCs will use plantations as their main source of agriculture while MDCs use more advanced forms of agriculture like genetic breeding for the best outcome of genes. Or how MDCs rely on LDCs for all of their food, but LDCs need the money from the MDCs causing a mutualistic relationship.

(all other artists)

SHUT UP

(Music fades out)

Please don't say shut up in my classroom.

I thought of the song when my classmates were not using their time correctly to actually figure out what we were doing. So I poured my friends and my own emotions into writing and made this song with the helpful advice of said friends.
