

HR Manager,

Dear Sir,

I am writing to apply for the position of Java Developer. My over 1 years of experience in Software Development includes duties pertaining to Modules Development using Core Java, Servlet, JSP, Spring and Hibernate, Developing the Front End using HTML5 and CSS3 won Bootstrap Frame Work. Generating Daily Status Report (DSR), Unit Testing, Root Cause Analysis, and so on.

I am a B.Tech (ECE) and have also completed Java Training from NIIT,Kumardhubi. Maithon, West Bengal. I am currently working as Software Engineer with Mindteck organisation. This role requires me to develop software solutions, understand process requirements, providing use cases for business, functional & technical requirements, participating in end-to-end Software Development Lifecycle (SDLC), mapping requirements, reviewing the functional requirement documents, conducting functional tests & analysis of reported defects and so on.

While my resume is attached for your perusal, a list of accomplishments indicative of my experience includes:

- Extensive experience of working on technologies like Core Java,OOPS, JDBC, Servlet, JSP, Spring MVC, Hibernate, Ajax, MVC, HTML, HTML5, JavaScript, jQuery & Bootstrap and so on
- Expertise in all phases of Software Development Life Cycle (SDLC) including requirement analysis, design, development, implementation, delivery and troubleshooting.

I am a solutions-oriented person who thrives in challenging, fast-paced environments where my performance directly impacts the bottom line. I believe that my strong background in IT combined with my extensive experience in planning, executing, monitoring, and closing a variety of projects, makes me ideally suited to this role.

I bring to your company my keen problem solving capability with relevant experience and my drive for results and positive outcomes. I am prepared for the next challenge in my career and look forward to hearing from you.

Best Regards,
Siddharth
