# How to play as Sopo in Slippi

(Only works in Direct Mode, will not work in Matchmaking)
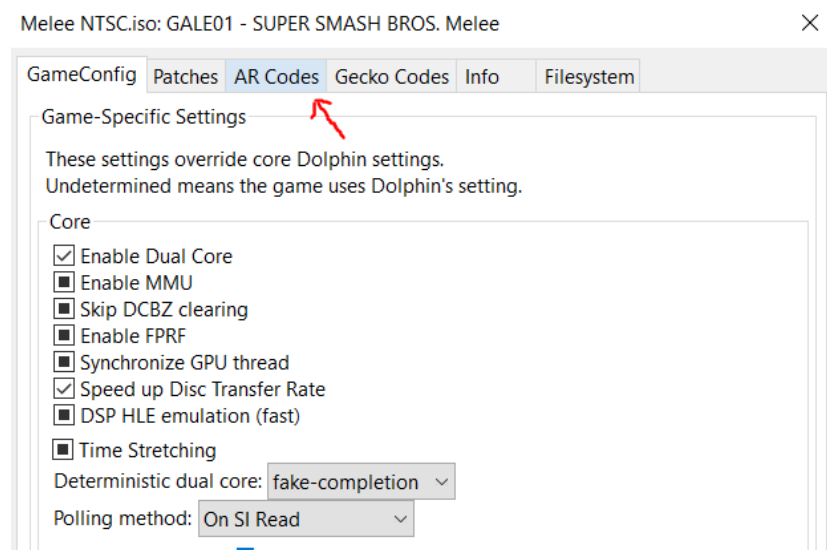

The method is very simple, to play Sopo in Slippi all you have to do is add this AR code to your Melee ISO:

Play as Sopo over Fox:
043F0C3C 2020FF00

Step 1: Open Dolphin, right click on the Melee ISO you use for Slippi and click "properties".

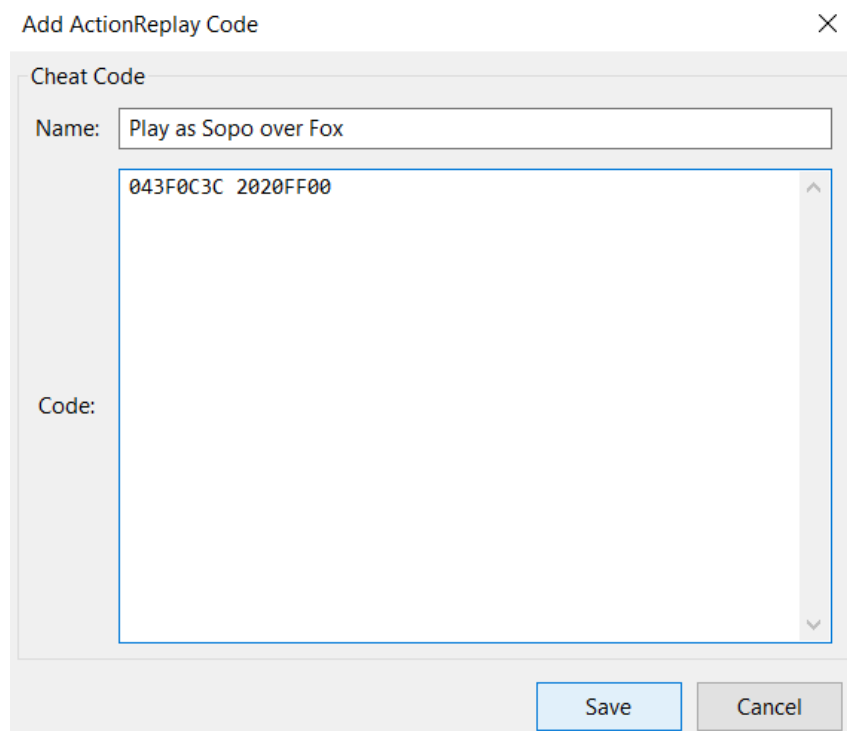

Step 2: Go to "AR Codes".

Step 3: Click on "Add New Code"

Step 4: Insert the name of the code (it can be whatever you want) and the code 043F0C3C 2020FF0 and click "Save".

And You're done! Now on the CCS if you pick Fox and start a game, you'll be Sopo! (remember this won't work in matchmaking).

To turn off the AR code all you have to do is right click on your Melee ISO, go to properties > AR codes and click on the box near the code name to turn it off.
