

Star Wars Logic Puzzle Walkthrough SPOILERS!!!

Plagueis - My apprentice's assassin is directly below me. Everyone in Row 4 appears in the Clone Wars				

Darth Plagueis' apprentice is Palpatine, and while Plagueis is alive, Palpatine can not have a true apprentice so as to not break the rule of 2, so Palpatine's apprentice is technically an assassin. Palpatine's apprentice while Plagueis is alive is **Darth Maul**. We also now know that every character in row 4 is in the Clone Wars which will rule out other characters in future hints.

Plagueis - My apprentice's assassin is directly below me. Everyone in Row 4 appears in the Clone Wars				
Darth Maul – I can see Lady Tano in the corner. Padme shares a diagonal with Plagueis. D3 does not appear in IV-VI.

Darth Maul's clue indicates that he can see Ahsoka Tano in the corner. The only corner that he can see is A5 so Ahsoka is in A5. Maul's clue also says Plagueis shares a diagonal with Padme so she must be in B2, C3, D4 or E5. We also know that D3 appears only in the prequel trilogy and the Clone Wars.

Ahsoka Master, I see you are caught in the middle adjacent to Darth Tyrannis, I won't leave you.				Padme

Ahsoka's clue states that her master is in the center, meaning Anakin is in C3, next to Count Dooku. We don't have enough information yet to say where Count Dooku is. We can also rule out that Padme is not in C3.

Ahsoka Master, I see you are caught in the middle adjacent to Darth Tyrannis, I won't leave you.				Padme

Anakin's clue states that Padme and Anakin are separated by Obiwan. Given Maul's clue, the only place that Padme can be is E5. Since Obiwan separates Anakin and Padme, we know that Obiwan is in D4.

Ahsoka Master, I see you are caught in the middle adjacent to Darth Tyrannis, I won't leave you.				Padme Everyone in my column appears in the original trilogy (Except me). The other Naboo native is adjacent to his master and all of his apprentices

Padme states that everyone in her column appears in the Original Trilogy (Episodes IV-VI). The other naboo native is referring to Palpatine, who must border all of his apprentices (Maul, Anakin) plus Plagueis. The only cell Palpatine can be in is B2.

Obiwan's clue gives us that Qui-Gon shares a diagonal with Maul.

Plagueis - My apprentice's assassin is directly below me. Everyone in Row 4 appears in the Clone Wars	Qui-Gon			Episodes IV-VI
Darth Maul – I can see Lady Tano in the corner. Padme shares a diagonal with Plagueis. D3 does not appear in IV-VI.	Palpatine - The 3 clones in this quiz are all adjacent. Ahsoka's Clone Wars friend is in C5			Episodes IV-VI

Palpatine's clue tells us that Ahsoka's friend is in C5. Ahsoka's main friend in the Clone Wars is **Barriss Offee**. We also know that there are 3 clones in this quiz.

Plagueis - My apprentice's assassin is directly below me. Everyone in Row 4 appears in the Clone Wars	Qui-Gon			Episodes IV-VI
Darth Maul – I can see Lady Tano in the corner. Padme shares a diagonal with Plagueis. D3 does not appear in IV-VI.	Palpatine - The 3 clones in this quiz are all adjacent. Ahsoka's Clone Wars friend is in C5			Episodes IV-VI

Ahsoka Master, I see you are caught in the middle adjacent to Darth Tyrannis, I won't leave you.		Barriss Offee - Everyone in my column is shown on the light and dark sides (Even in visions)	Qui-Gon	Padme Everyone in my column appears in the original trilogy (Except me). The other Naboo native is adjacent to his master and all of his apprentices

Barriss's clue tells us that everyone in her column is shown on the light and dark sides. Because of Padme's clue, we know that Palpatine is adjacent to all of his apprentices,

and Ahsoka's clue says that Anakin is adjacent to Dooku. Therefore, Dooku must be in C2.

We can also rule out Qui-Gon in C4 because he never turns to the dark side.

Plagueis - My apprentice's assassin is directly below me. Everyone in Row 4 appears in the Clone Wars	Qui-Gon			Episodes IV-VI
Darth Maul – I can see Lady Tano in the corner. Padme shares a diagonal with Plagueis. D3 does not appear in IV-VI.	Palpatine - The 3 clones in this quiz are all adjacent. Barriss Offee - Everyone in my column is shown on the light and dark sides (Even in visions)	Qui-Gon	Padme Everyone in my column appears in the original trilogy (Except me). The other Naboo native is adjacent to his master and all of his apprentices

Dooku's clue tells us that the only cyborg in the quiz is in B2, meaning Grievous must be in B2. Dooku also shares a diagonal with his old master, Yoda.

E4 must be Yoda because he appears in the Clone Wars as well as the original trilogy and shares a diagonal with Count Dooku.

Plagueis - My apprentice's assassin is directly below me. Everyone in Row 4 appears in the Clone Wars	General Grievous Grand Moff Tarkin is in this quiz			Episodes IV-VI

The other Naboo native is adjacent to his master and all of his apprentices

We now know that Tarkin is in this quiz.

Yoda's clue tells us that A3 and B3 are droids, meaning C-3PO and R2-D2 are there.

We now know that Qui-Gon must be in D5 because B3 is a droid, B1 is Grievous and he does not turn to the dark side.

Bail Organa picked Yoda up after his duel with Palpatine so Bail goes in D3.

Bail's clue tells us that Leia is in D2, E2 or E3 and that Han and Chewbacca are directly next to each other.

Qui-Gon's clue tells us that he can see a Captain he never met, meaning he can see Captain Rex. The only place that Captain Rex can be is B5 because he has to be adjacent to the other 2 Clones so the only other place he could go would be C1, D1 or D2, but since Han and Chewbacca are next to each other, they have to take up either D2, E2 or C1, D1 or E1,D1.
