We are looking for a front-end developer who can convert our Figma designs to next.js without using plugins. We'll need the code for desktop, mobile, and tablet.

There are also animations within the design that we'll need converted to code. We can review how the animations should work on a call, but below is an explanation. All videos and images will be supplied before kickoff if needed.

Final deliverable: Code for figma designs in next.js for desktop/phone/tablet that includes animations.
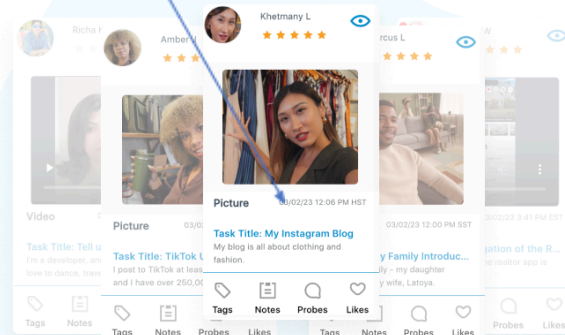

Explanation of Animations

1) **The word Customer will transition to Users, Employees, and Consumers similar to:**
   https://www.remesh.ai/

2) **Participants should be able to scroll through these images on all devices. It will not auto scroll, users will have to user their mouse on desktop and finger on tablet/mobile.**

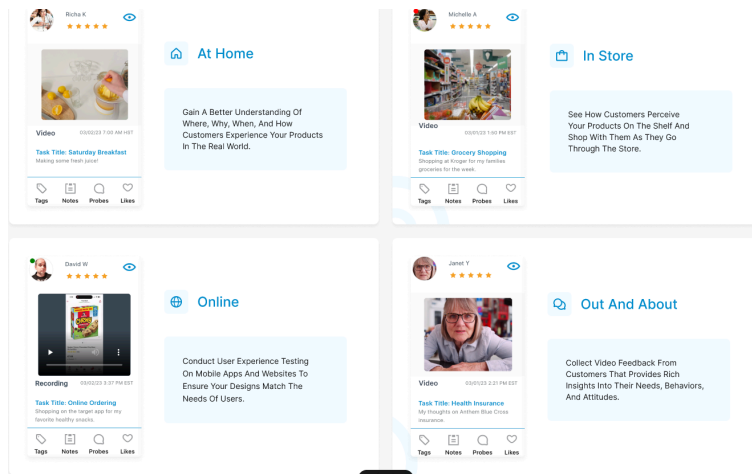

3) **When the user reaches this section, the top left video will auto-play. Once it stops, the top right video will autoplay, then bottom left, and last will be bottom right. Each video is 7-8 seconds.**
   a. **On mobile devices the user should be able to manually scroll through these videos with their finger.**
   b. **Examples of auto-playing video: https://site.voxpopme.com/, https://www.lookback.com/**

4) This video will automatically play when the user reaches this section.

5) This video will also automatically play when the user reaches this section.
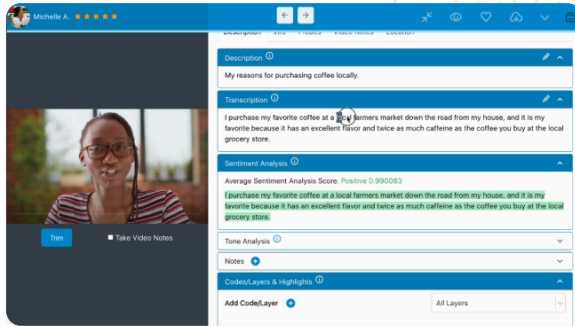

Accelerate Your Speed to Insight

Recruit your own participants or have our team recruit for you with 48-hour turnaround times.

Build a project in a fraction of the time it takes to program a survey.

Launch unmoderated studies or dig into experiences by asking follow-up probing questions.

Leverage auto-transcriptions, AI, and out-of-the-box reports to extract themes, pinpoint frustrations, and discover ways to innovate.
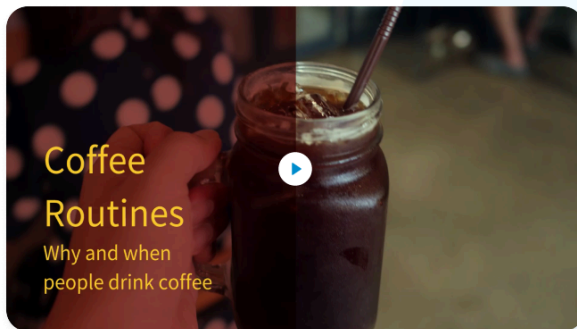

6) **This will NOT automatically play. The user will need to click on the video to play it.**
   a. **Example: https://site.voxpopme.com/agile-qualitative/**

Foster a Customer Centric Culture Throughout Your Organization

Combine video snippets, quotes, and images into digestible reels that resonate with stakeholders and impact decisions.

7) **The logos will automatically scroll when the user reaches this section.**

8) **The Request Demo button should always be in the user's view as they scroll similar to https://www.usertesting.com/.**

Figma files were supplied upon getting a bid back. No emails or calls outside of this platform will be considered.
