
## Emote Attribution - How to Assign an Artist to an Emote:

Follow this procedure to credit an artist who made an emote for you. This will display their Twitch username on the emote details.

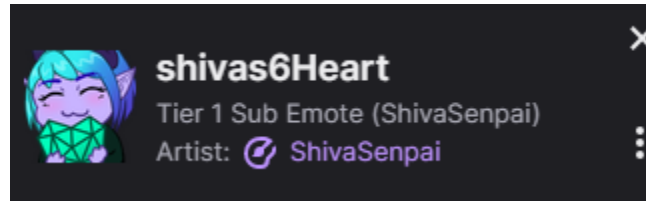

1. First, your artist needs to have ***Allow attribution on Twitch*** enabled.
   (If I, ShivaSenpai, am your artist then you can skip to step 2 as I already have this enabled.)
      a. The artist can find Emote Attribution by clicking on their profile picture when logged into Twitch then select **Emote Attribution** from the menu.

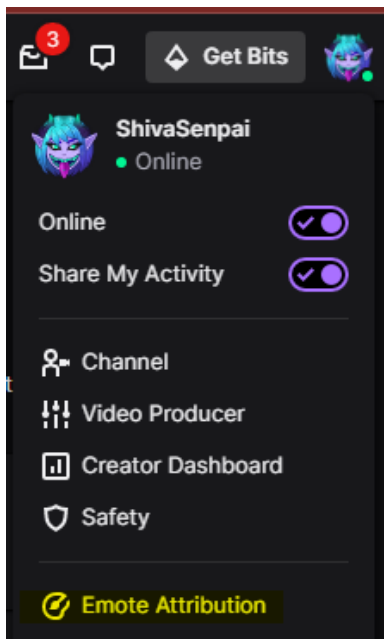

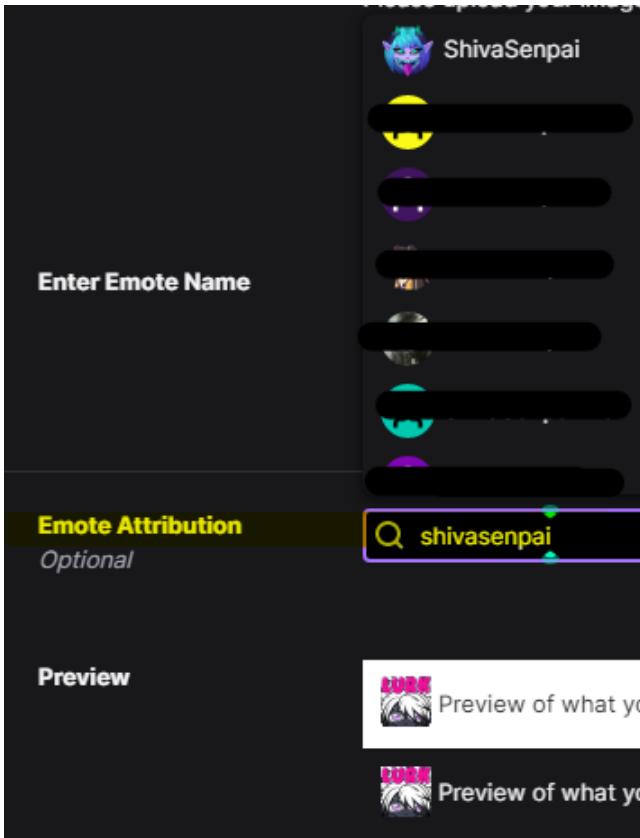

2. Log into your Twitch account.
3. Click on your profile picture in the upper right > select **Creator Dashboard**.
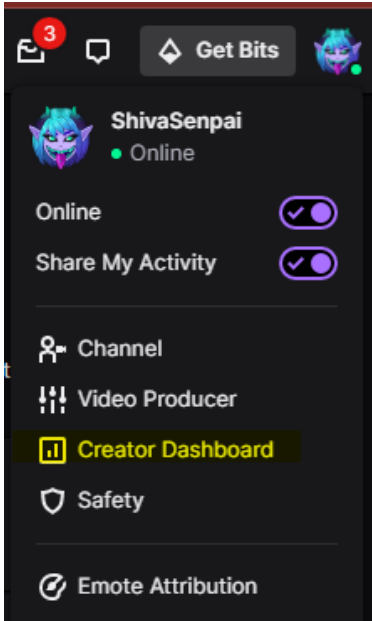

4. In the column on the left, select **Viewer Rewards** > **Emotes**.
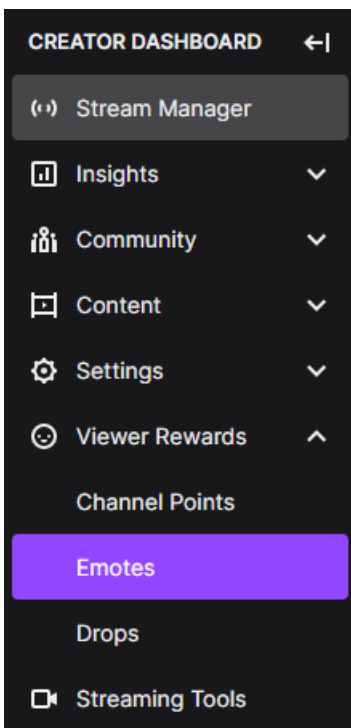

5. When you upload the emote, enter the artist's Twitch username into the ***Emote Attribution*** field.

6. Your artist will say **pending** for now. Once you upload the emote, a notification should be sent to your artist asking them to approve the emote attribution. Once the artist approves, they should now display when viewers click on your emotes.

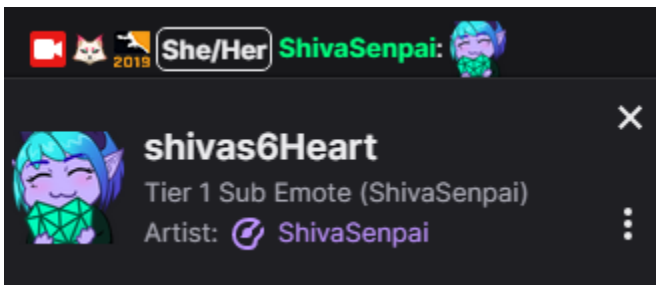

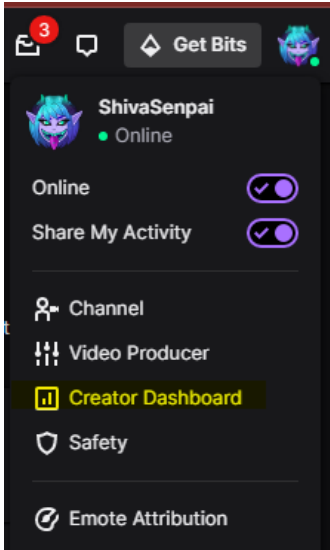

# Artist Badge - How to Assign the Artist Role:

Follow this procedure to grant an artist the Artist Role on your channel. This will display an artist badge next to their name in your chat.

1. Log into your Twitch account.
2. Click on your profile picture in the upper right > select **Creator Dashboard**.
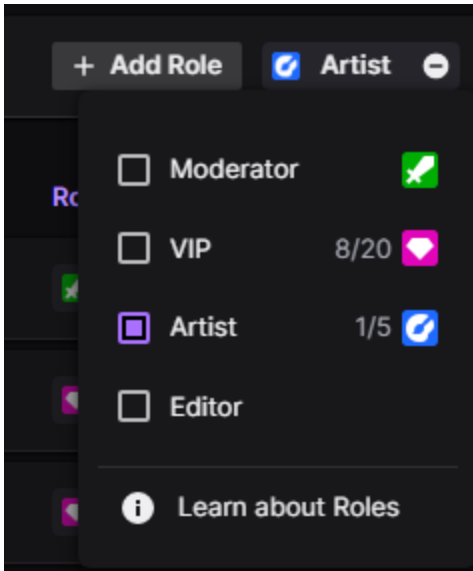

3. In the left column, select **Community** > **Roles Manager**.

4. Click the **Add New** button > type the artist's Twitch username into the **Search** box > select the artist.

5. Select the **Artist** role.

6. Now the artist icon should display by that artist's name on Twitch whenever they're in your chat like so:
