

Lab Safety Rules

1. **ALWAYS** wear an apron or protective clothing when working with chemicals.
2. **ALWAYS** tie back loose hair.
3. **ALWAYS** wear goggles or safety glasses to prevent getting materials in your eyes.
4. **ALWAYS** read the labels on chemicals and heed all warnings.
5. **NEVER** eat, drink, or smell the chemicals. Rather carefully "fan" the fumes to your nose.
6. **NEVER** look directly into a test tube or flask. Look at the contents from the side.
7. **NEVER** play around during experiments.
6. **ALWAYS** wash your hands after handling lab materials.
