| Boat      | Date - Name | Task to Be Done<br>(Description)                                                                                  | Task Done<br>(Short description)                                                                                                                                                                                                                                                                                                                                                                      | Done by<br>(Date - Name) |
|-----------|-------------|-------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
|           |             |                                                                                                                   | balcony has fixed again and a solution to tension more the security line has been found. The repair needs to be checked if acceptable until the boat will go out of water.<br><br>A second advice will be ask to another welder, and it will also be asked if a new balcony could be made and at what price...                                                                                        |                          |
| Gipsy     | 20/10       | The jib cover zip needs repair                                                                                    | Headsail cover will be given to Arnaud 29th with other sails.                                                                                                                                                                                                                                                                                                                                         |                          |
| Jedi      | 19/10       | Engine didn't start.                                                                                              | After checking the engine everything seems ok but it needs some strengths to make it start.                                                                                                                                                                                                                                                                                                           | 19/10                    |
| Jedi      | 12/10       | The tiller extension hinge is broken.                                                                             | The tiller extension has been changed.                                                                                                                                                                                                                                                                                                                                                                | 12/10                    |
| Mamma Mia | 08/10       | The metal piece that holds down the main sail to the metal trail of the boom is detached (old and used material). | 08/10 - This piece has been put into the box where the batteries are. It has to be sewed back to the ring of the clew of Mainsail.                                                                                                                                                                                                                                                                    |                          |
| MicMac    | 08/10       | The tiller needs to be tightened.                                                                                 | 23/10 - The tiller has been tightened to reduce play. May we need to tighten screws holding fitting to deck as well                                                                                                                                                                                                                                                                                   | 23/10                    |
| J70       | 04/10       | A small hole in the gelcoat near the port side winch has appeared                                                 | 06/10 - Some sail repair tape has been put on top of the hole, but needs more sound attention in the next few days.<br>24/11-The boat has been brought to Marine Creation for repair                                                                                                                                                                                                                  |                          |
| Jedi      | 29/09       | The battery on J80 died during an outing ...                                                                      | The battery needs to be recharge.<br><br>30/09 - Battery took out of the boat and connected to the charger here in the computer compartment.<br>Recommended to leave charging for 24h (should be ready Monday evening).<br>The key necessary to install it back is 13 mm wrench.<br><br>06/10 - he battery installed back (the status of the battery was charged - "chargee"). Lights work perfectly. | 06/10                    |
| Mamma Mia | 29/09       |                                                                                                                   | The spinnaker boom halyard shackle and the genoa sheets have been changed                                                                                                                                                                                                                                                                                                                             | 29/09                    |
| Mic Mac   | 26/09       | Impossible to start the motor while coming back to the port, The motor started easily while going out             | Motor started first time but will be serviced tomorrow as needs anti pollution test                                                                                                                                                                                                                                                                                                                   | 27/09                    |
| Jedi      | 25/09       | One of the sliders that attaches the main sail to the mast was broken. Need to be changed                         | broken slider replaced with Jurgen who will report back whether additional slider at bottom of sail is required                                                                                                                                                                                                                                                                                       | 27/09                    |
| Aquila    | 25/09       | Due to a strong bise, the boat got loose and has crashed on the rocks in Versoix<br>It's out of order             | 28/09 - Aquila now gone to Marine Creation in Collex<br>Aquila has been identified as a total wreck                                                                                                                                                                                                                                                                                                   | 14/11                    |

# 2018 YCC KeelBoats Maintenance Logbook

This is the list of maintenance tasks or repairs that have to be done on the YCC Keelboats.

- If you are willing to help on maintenance and can or feel to do the task you are are welcome.
- Once the task is done and completed, please add a short description in the column **Task Done**, fill your name and date in the column **Done by** and paint the row in grey.
- Please feel free to insert new tasks (latest = first row) with date and your name in the column **Date - Name** and a description of the task in the column **Task to Be Done**.

Voici la liste des tâches de maintenance ou des réparations à effectuer sur les quillards de notre club.

- Si vous désirez participer aux maintenances ou si vous pouvez ou désirez effectuer une tâche, votre aide est vraiment la bienvenue.
- Une fois la tâche effectuée et terminée, ajouter s'il vous plaît une brève description dans la colonne **Task Done**, ajouter votre nom et la date dans la colonne **Done by** et griser les cases.
- Si vous remarquez un problème, n'hésitez pas à ajouter une ligne au début du tableau avec la date et votre nom dans la colonne **Date - Name** et une brève description de la tâche dans la colonne **Task to Be Done**.

| Boat      | Date - Name | Task to Be Done<br>(Description)                                                                                                | Task Done<br>(Short description)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Done by<br>(Date - Name) |

| Gipsy     | 22/09       | The zipper for the genoa cover is torn at the beginning of the zip which makes it very difficult to close.                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                          |
| Jedi      | 22/09       | The mast light is not working...<br>This is probably due the bulb                                                               | 29/09 - Maciej Gladki went out with the navigation lights for motoring (all fine, although seemed a bit dimmed), when he went to switch navigation lights to sailing he realized the battery died.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                          |
| Mic Mac   | 22/09       | The rudder seems somewhat loose.                                                                                                | See above                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 23/10                    |
| Mic Mac   | 21/09       | Preparation for the periodical boat inspection                                                                                  | 0/10 - Control passed, the only raised point was on gasoline smell in the battery compartment.<br><br>27/09 - Security check for upcoming controle technique. both deck and top mast lights work and all items from required chexcklist aboard.<br><br>27/09 - only ca 6 m line attached to yellow horseshoe flotation device. Needs 10 m to comply to inspection standards. Recuperate from Aquila?<br><br>28/09 - motor removed for anti-pollution test.<br>28/09 - motor back on and I have valid anti-pollution paper<br>02/08 - boat washed for inspection.                                                                                                                                                                                                                               | 08/10                    |
| Mamma Mia | 21/09       | The genoa reef sheet seems may be a bit too short to roll the genoa fully.                                                      | To be checked if the genoa is well rolled?<br><br>24/09 - Furling line OK (leave only three turns when rolled in).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 24/09                    |
| Mamma Mia | 21/09       | There was again 30l of water inside all the lockers<br>14/10 - 2 buckets of water from the back (outside) lockers have put out. | 21/09 - The water has been pumped out.<br>A lot of garbage has been put to the bin. All the paper documentation has been taken out for drying.<br>28/09 - The boat has been checked for leaks. several small problems to be found : <ul style="list-style-type: none"><li>• in the front of the cabin near the mast there is a small leak... May be due to the speedo...</li><li>• the ladder in the back has to be well closed, otherwise some water can come in...</li><li>• The seals of the back windows in the cockpit may be little damaged</li></ul> Otherwise the boat doesn't see to have serious leaks.<br><br>17/10 - The ladder cover back has been fitted back with Sikaflex. It holds on place but it seems to be slightly leaking still. Perhaps Sikaflex needs time to harden. |                          |

|           |                |                                                                                                                                                              | <div>The boat should be brought out of water to see if there isn't any leak problem near the keel.</div> <div>03/11 - the boat has been taken out of water to check the hull, and nothing appeared.<br/>The next check will be to sail with her in good wind conditions and to check it</div> |                          |
| J70       | 11/09          | Corrector weights need to be glued.                                                                                                                          | The corrector weights have been glued in place. 2 kg aft. 2kg forward                                                                                                                                                                                                                         | 11/09                    |
| Gipsy     | 09/09          | The boat was very dirty.                                                                                                                                     | An extensive scrubbing of deck and cockpit have been done                                                                                                                                                                                                                                     | 09/09                    |
| Mic Mac   | 09/09          | The jib bag zip is malfunctioning. It needs repair.<br>The release lever of the winch is about to break.                                                     | 11/09 - The Foresail cover ordered for delivery by end of September.<br>11/09 - The winch handle has been replaced                                                                                                                                                                            |                          |
| Mamma Mia | 07/09          | There is no shackle for the tack and the head of the genoa.<br>Two shackles need to be buy, one small for the tack, one bigger one for the head of the sail. |                                                                                                                                                                                                                                                                                               | ?                        |
| Jedi      | 04/09          | The little plastic/rubber thing on the end of the tiller extension keeps falling off and needs super glue or tape. so it is in the sail repair box.          |                                                                                                                                                                                                                                                                                               |                          |
| Jedi      | 27/08          | All the fender on board have disappeared                                                                                                                     | One fender has been taken from Mic Mac                                                                                                                                                                                                                                                        |                          |
| Mic Mac   | 27/08          | The motor seems to have a problem: when engaging the speed back, it works but may jump into neutral if a lot of gas has been given.                          |                                                                                                                                                                                                                                                                                               |                          |
| Mlc Mac   | 26/08          | The shackle on jib has broken.<br>It needs to be replaced in order to use the jib                                                                            |                                                                                                                                                                                                                                                                                               |                          |
| Mamma Mia | 26/08          | The spi pole hanger is almost broken on one side and missing on the other.                                                                                   |                                                                                                                                                                                                                                                                                               |                          |
| Gipsy     | 24/08          | Instrument covers missing!                                                                                                                                   |                                                                                                                                                                                                                                                                                               |                          |
| Mamma Mia | 23/08          | We need to find a new mooring solution for the boat<br>as the place has to be freed before 30/08                                                             | <div>The buoy No 10 outside can be used.</div> <div>We need to decide which boat should be moved to this buoy.<br/>Finally it is Aquila which has been moved on the buoy.</div>                                                                                                               | 28/08                    |
| Mamma Mia | 21/08<br>22/08 | <div>There is a problem with the genoa furler.</div> <div>Shackle to fix genoa head to furling system missing. Furling system ok otherwise</div>             | <div>The broken shackle removed on foresail.</div> <div>The next user should confirm that it works.</div>                                                                                                                                                                                     | 24/08                    |
| Jedi      | 21/08          | The port side pulley for the spi is not working properly.<br>Missing Jib                                                                                     | Small repairs in sails                                                                                                                                                                                                                                                                        |                          |

# 2018 YCC KeelBoats Maintenance Logbook

This is the list of maintenance tasks or repairs that have to be done on the YCC Keelboats.

- If you are willing to help on maintenance and can or feel to do the task you are are welcome.
- Once the task is done and completed, please add a short description in the column **Task Done**, fill your name and date in the column **Done by** and paint the row in grey.
- Please feel free to insert new tasks (latest = first row) with date and your name in the column **Date - Name** and a description of the task in the column **Task to Be Done**.

Voici la liste des tâches de maintenance ou des réparations à effectuer sur les quillards de notre club.

- Si vous désirez participer aux maintenances ou si vous pouvez ou désirez effectuer une tâche, votre aide est vraiment la bienvenue.
- Une fois la tâche effectuée et terminée, ajouter s'il vous plaît une brève description dans la colonne **Task Done**, ajouter votre nom et la date dans la colonne **Done by** et griser les cases.
- Si vous remarquez un problème, n'hésitez pas à ajouter une ligne au début du tableau avec la date et votre nom dans la colonne **Date - Name** et une brève description de la tâche dans la colonne **Task to Be Done**.

| Boat      | Date - Name | Task to Be Done<br>(Description)                                                                                                   | Task Done<br>(Short description)                                                                                                                                                                                                                                                   | Done by<br>(Date - Name) |
|-----------|-------------|------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| Mamma Mia | 19/08       | There was at least 30l water in cabin.<br>manual and books completely soaked,                                                      | Lot of water pumped out...<br><br>It should be checked if there is a leak somewhere should be checked?<br><br>21/08: Checked water. a few litres in rear compartments otherwise ok<br><br>22/08: no water seems to be inside...                                                    |                          |
| Jedi      | 17/08       | gennaker boom tack line missing.                                                                                                   | It has been replaced with a new one (blue 10 mm) from Moby Dick.                                                                                                                                                                                                                   | 17/08                    |
| Jedi      | 17/08       | There are no headsail as both under repair and also headsail tack shackle missing.                                                 | Genoa repaired with kit and should be good enough but take care and not for use above bft 3.<br>Shackle for genoa installed.                                                                                                                                                       | 19/08                    |
| Mamma Mia | 13/08       | Main sail windows again damaged...                                                                                                 | The damage in the window of mainsail has been repaired.<br><br>Due to the recurrent problem, not sure if it needs a professional to look at it, hence the warning.<br>But for this we need a spare one...                                                                          |                          |
| Jedi      | 13/08       | The lights are very weak, may be it is due to low battery or bad contacts.                                                         | Battery reinstalled and 12.7V.<br>Lights and voltage to be controlled<br>18/08 lights working fine                                                                                                                                                                                 | 18/08                    |
| Mic Mac   | 11/08       | The attachment of the forestay is defective. To be repaired imperatively with any other outing                                     | The 2 split pins missing in forestay have been changed, but the rings need to be tapped.<br><br>Genoa to be checked                                                                                                                                                                | 13/08                    |
| Jedi      | 12/08       | Two nuts found missing on engine mount. They needs replacement urgently, as engine could potentially detach.                       | The nuts have been replaced.                                                                                                                                                                                                                                                       | 12/08                    |
| Mamma Mia | 09/08       | Safety buoy has leak (was water filled). Hung to drain at rear.<br>Need to repair hole.                                            | 21/09 - The leaking safety buoy has been taken to buy a new one.                                                                                                                                                                                                                   |                          |
| Mic Mac   | 05/08       | The top mast light and engine light are not working as noticed by coming back at night                                             | The battery is ok I think, deck light, cabin light and compass light are working but the 2 important ones not.<br>Connector at mast foot was plugged correctly.<br><br>Mast electric cable to be repaired.                                                                         | 12/08                    |
| Mamma Mia | 05/08       | the cover of the jib broke in the hole for the halyard, so the spinnaker halyard is irretrievable without taking it with the crane | The halyard was taken back and jib cover is being repaired,<br>Meanwhile just put the jib down at nights.<br><br>Old cover repaired but in poor state so have ordered a new one.<br><br>20/09 - The zip on new genoa cover installed today still a bit stiff so it should be payed | 05/08<br>20/09           |

# 2018 YCC KeelBoats Maintenance Logbook

This is the list of maintenance tasks or repairs that have to be done on the YCC Keelboats.

- If you are willing to help on maintenance and can or feel to do the task you are are welcome.
- Once the task is done and completed, please add a short description in the column **Task Done**, fill your name and date in the column **Done by** and paint the row in grey.
- Please feel free to insert new tasks (latest = first row) with date and your name in the column **Date - Name** and a description of the task in the column **Task to Be Done**.

Voici la liste des tâches de maintenance ou des réparations à effectuer sur les quillards de notre club.

- Si vous désirez participer aux maintenances ou si vous pouvez ou désirez effectuer une tâche, votre aide est vraiment la bienvenue.
- Une fois la tâche effectuée et terminée, ajouter s'il vous plaît une brève description dans la colonne **Task Done**, ajouter votre nom et la date dans la colonne **Done by** et griser les cases.
- Si vous remarquez un problème, n'hésitez pas à ajouter une ligne au début du tableau avec la date et votre nom dans la colonne **Date - Name** et une brève description de la tâche dans la colonne **Task to Be Done**.

| Boat      | Date - Name | Task to Be Done<br>(Description)                                                                                                                                                                                                                                                                                                                                                                                                                              | Task Done<br>(Short description)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Done by<br>(Date - Name) |
|-----------|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
|           |             |                                                                                                                                                                                                                                                                                                                                                                                                                                                               | attention to inserting first bit of zip FULLY into slider before closing zip otherwise damage will result. They cost two annual membership fees....                                                                                                                                                                                                                                                                                                                                                                                                             |                          |
| Jedi      | 04/08       | There are many bits and pieces to be looked at:<br>a) a metal bar on engine to hook on in reverse is gone<br>b) the second mainsail glider from top is broken<br>c) the second barber is still missing<br>d) a crack in front which was already reported: makes boat out of order if there are waves!<br>e) on the neighboring boat the metal bit on the rubbing strake has come loose mid-ships, careful when leaving that you do not rip it off completely. | 08/07 - The bow has been repaired, although final filling and painting outstanding.<br>One slider on main has been replaced, one missing at bottom still outstanding.<br>A new pin in motor has been put.<br>The new barber to follow...                                                                                                                                                                                                                                                                                                                        |                          |
| Mic Mac   | 01/08       | The motor cut out after 1 min and then it didn't manage to start again.                                                                                                                                                                                                                                                                                                                                                                                       | A possible explanation for this issue may be related with the motor problem in the log entry from July 27 (see below) : Fuel still contaminated with water...<br><br>The motor <u>and</u> tank will almost certainly have to be taken to the mechanic in Crans for a service.<br><br>The valve to select the fuel source has not been checked. It was on the wrong position.<br><br>Engine tested under load at the buoy it starts and run smoothly for more than 10 minutes, both from internal tank where there is still 0.2L of fuel and from external tank. | 02/08                    |
| Mamma Mia | 29/07       | There is a missing bolt on the steel footrest for helmsman on starboard                                                                                                                                                                                                                                                                                                                                                                                       | 04/07 - replaced missing screw for footrest helmsman<br>replaced metal fitting on genoa sheets (old one was damaged and did not function properly)<br>looking to replace metal fitting to hold bottom of main sail at mast                                                                                                                                                                                                                                                                                                                                      | 04/08                    |
| Jedi      | 29/07       | One barber hauler for asymmetric spi is missing.                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                          |
| J70       | 29/07       | The plastic pieces at the end of each pockets for the battens on the mainsail have come loose and are about to be lost! More than half of the screws and nuts are already gone.                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                          |
| Mamma Mia | 29/07       | There is much friccion to turn outboard motor, which makes it difficult to steer, i.e. turn left & right.                                                                                                                                                                                                                                                                                                                                                     | The adjusting screw on the back of the motor at the top of the shaft has been loosened.                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 29/07                    |
| Mic Mac   | 27/07       | Boat found in bad conditions, liter gasoline spilled in the boat and full of gasoline vapour, The fuel was contaminated by water                                                                                                                                                                                                                                                                                                                              | 27/07: Almost everything had to be cleaned and reorder the stuff, sail on the right side, sheets in the left box....<br>The gasoline tank is it now in the external box.                                                                                                                                                                                                                                                                                                                                                                                        | 27/07                    |

# 2018 YCC KeelBoats Maintenance Logbook

This is the list of maintenance tasks or repairs that have to be done on the YCC Keelboats.

- If you are willing to help on maintenance and can or feel to do the task you are are welcome.
- Once the task is done and completed, please add a short description in the column **Task Done**, fill your name and date in the column **Done by** and paint the row in grey.
- Please feel free to insert new tasks (latest = first row) with date and your name in the column **Date - Name** and a description of the task in the column **Task to Be Done**.

Voici la liste des tâches de maintenance ou des réparations à effectuer sur les quillards de notre club.

- Si vous désirez participer aux maintenances ou si vous pouvez ou désirez effectuer une tâche, votre aide est vraiment la bienvenue.
- Une fois la tâche effectuée et terminée, ajouter s’il vous plaît une brève description dans la colonne **Task Done**, ajouter votre nom et la date dans la colonne **Done by** et griser les cases.
- Si vous remarquez un problème, n’hésitez pas à ajouter une ligne au début du tableau avec la date et votre nom dans la colonne **Date - Name** et une brève description de la tâche dans la colonne **Task to Be Done**.

| Boat | Date - Name | Task to Be Done<br>(Description) | Task Done<br>(Short description) | Done by<br>(Date - Name) |
|------|-------------|----------------------------------|----------------------------------|--------------------------|
|------|-------------|----------------------------------|----------------------------------|--------------------------|

|           |       |                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                 |       |
|-----------|-------|---------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| Mamma Mia | 27/07 | The engine support is difficult to handle.                                                                                                        |                                                                                                                                                                                                                                                                                                                 |       |
| Aquila    | 27/07 | the boat battery has been found dead.<br>A lamp in the bathroom cabin has been left on and that probably had drained battery.                     | Tried crank but that did not start motor either.<br>Ended up having to get ext battery and jumper cables and finally managed to start boat.<br>Motored to Tougues for dinner.                                                                                                                                   | 27/07 |
| Jedi      | 20/07 | A vertical stitching in bottom part of the genoa is undone/damaged on about 15 cm.<br>There is also a bigger rip in the leech of the genoa        | The Genoa is out of order.<br><br>06/08: Our sailmaker has check the genoa and recommends that it is not worth repairing.<br><br>The J/80’s rating with jib is faster than a Surprise!                                                                                                                          |       |
| Gipsy     | 13/07 | The safety line barrier around the port side need to be repaired.                                                                                 |                                                                                                                                                                                                                                                                                                                 |       |
| Gipsy     | 13/07 | The rudder tiller screws need to be urgently replaced and repaired. Risk of further damage to rudder.                                             | The screws on the tiller metal cover have been tightened.                                                                                                                                                                                                                                                       | 14/07 |
| Aquila    | 11/07 | Missing genoa cover.<br>It seems that it was broken and taken off for repair.                                                                     | The Genoa cover should be repaired if possible.<br>In the meantime the genoa should be taken down<br>16/08 - New sail covers have been installed                                                                                                                                                                | 16/08 |
| Mamma Mia | 07/07 | The port traveler cleat has broken during Swiss Su Championship                                                                                   | The broken port traveler cleat has been replaced.                                                                                                                                                                                                                                                               | 13/07 |
| Mamma Mia | 01/07 | Small hole in the transparent window closest to the foot of the main sail.                                                                        | Hole repaired with the tape.<br><br>The windows in the main sail needs to be Changed. We could do it during Swiss Championship                                                                                                                                                                                  | 01/07 |
| Mamma Mia | 01/07 | No fuel, and many small problems                                                                                                                  | Boat cleaned a bit and many small stuff have been fixed.                                                                                                                                                                                                                                                        | 01/07 |
| Aquila    | 29/06 | The liner is dropping in many parts, given the extent of the liner detachment( “kitchen, bathroom “etc) it would need industrial amounts of glue. | 29/06 - Some part has been glued                                                                                                                                                                                                                                                                                |       |
| Aquila    | 28/06 | The furling line for the genoa has broken. Should be replaced.<br>The handle of the genoa fall cleat has also broken.                             | 01/07 - The new furler line has been installed and genoa. jib halyard cam cleat closed.<br>Two new levers have also been ordered.<br>18/07 - The broken cleats have been exchanged on the deck.<br><br>The questions remains if we do not better install two 4-cleat blocks on the left and right of the cabin. | 18/07 |
| Mamma Mia | 27/06 | Mooring lines are too thin and fragile. Need to be changed?                                                                                       | A painter has been added to attach the boat to the bow for tying it to a quay.                                                                                                                                                                                                                                  | 28/06 |

# 2018 YCC KeelBoats Maintenance Logbook

This is the list of maintenance tasks or repairs that have to be done on the YCC Keelboats.

- If you are willing to help on maintenance and can or feel to do the task you are are welcome.
- Once the task is done and completed, please add a short description in the column **Task Done**, fill your name and date in the column **Done by** and paint the row in grey.
- Please feel free to insert new tasks (latest = first row) with date and your name in the column **Date - Name** and a description of the task in the column **Task to Be Done**.

Voici la liste des tâches de maintenance ou des réparations à effectuer sur les quillards de notre club.

- Si vous désirez participer aux maintenances ou si vous pouvez ou désirez effectuer une tâche, votre aide est vraiment la bienvenue.
- Une fois la tâche effectuée et terminée, ajouter s'il vous plaît une brève description dans la colonne **Task Done**, ajouter votre nom et la date dans la colonne **Done by** et griser les cases.
- Si vous remarquez un problème, n'hésitez pas à ajouter une ligne au début du tableau avec la date et votre nom dans la colonne **Date - Name** et une brève description de la tâche dans la colonne **Task to Be Done**.

| Boat            | Date - Name | Task to Be Done<br>(Description)                                                                                                                                     | Task Done<br>(Short description)                                                                                                                                                                                                                                                                                        | Done by<br>(Date - Name) |
|-----------------|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| Jedi            | 27/06       | A coulisseau on the main broke during the outing.                                                                                                                    | The mast slider has been fixed.                                                                                                                                                                                                                                                                                         | 29/06                    |
| Jedi            | 27/06       | The engine had to be taken off as there is a crack in the plastic bracket which need to be replaced.                                                                 | 27/06: The bucket for the engine has been ordered urgently at SUI 46°16' shop<br><br>01/07: motor bracket work started and if all goes well will be completed on monday morning<br><br>02/07: new motor bracket fitted and checked by Michel Cornevin                                                                   | 02/07                    |
| Jedi<br>Mic Mac | 22/06       | No second winch handle found need to buy spares one.                                                                                                                 | 26/06: 2 spare 20cm winch handles ordered at SUI 46°16' shop. Normally they arrive on Tuesday 03/07<br>31/07 - Winch handles have been taken                                                                                                                                                                            | 31/07                    |
| Jedi            | 21/06       | No winch handles on board                                                                                                                                            | Spare winch handle from underneath port side birth has been found and put into winch holder.                                                                                                                                                                                                                            | 22/06                    |
| Mamma<br>Mia    | 20/06       | New problem with motor : it doesn't keep forward gear with more than minimum...                                                                                      | Motor has been brought to Martin for a repair...<br><br>22/06: Motor repaired and back on boat. not tested as bft 5.<br><br>23/06: Andreas Valda validated that engine runs perfectly...                                                                                                                                | 23/06                    |
| Mamma<br>Mia    | 17/06       | Choke pull on outboard found broken....                                                                                                                              | Mr Martin will be asked if his technician can pass and replace the choke or if the motor should be taken away for reparation?<br><br>19/06 - The repair should be done tonight at port                                                                                                                                  | 19/06                    |
| Gipsy           | 15/06       | The helm feels a bit shakey, while on engine. The rudder fitting seems OK though, so not sure what's the reason (something with the propeller?)                      | 17/06 Marcel Arditi has been asked for advice if we should ask Mr Martin to have a look at the propeller or if we need to check by an another outing.<br><br>After investigation, it points out that the shacking and wobbling is nothing new and is caused by the flow of water over what is a poorly profiled rudder. | 19/06                    |
| Mic Mac         | 12/06       | MainSail window broken again!                                                                                                                                        | Holes have been repaired with the on board repair material.<br>The MainSail windows has to be replaced.                                                                                                                                                                                                                 | 12/06                    |
| Jedi            | 11/06       | ENGINE vibrates and it becomes very hot on the middle of feet , so we suspect transmission axel bearing are damaged?<br>The gasoline input on motor side unscrews... | Problem seems to be more serious, it needs to get a service. M. Jérôme Martin has been contacted<br>Until repaired, motor should not be used.<br><br>Motor replaced and working fine.                                                                                                                                   | 15/06                    |

|           |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Notice : the fuel line should always be removed before lifting and tilting.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |       |
| Mic Mac   | 10/06<br>11/06 | Problem with the door lock which doesn't close any more.<br>Holes in spinnaker and Main sail Windows.                                                                                                                                                                                                                                                                                                                                                                        | Door lock arranged, so that it should be ok for some time. If not will may need to change the door lock and do a new door panel.<br>Holes have been repaired with the on board repair material.<br>It's the 3rd or 4th time this year that I have to repair the MainSail windows which is in very bad state. We should change it                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 12/06 |
| Mamma Mia | 07/06          | Looking for a temporary mooring place for Mamma Mia                                                                                                                                                                                                                                                                                                                                                                                                                          | Actually Mamma Mia is on a visitor place a really temporary solution.<br><br>Potential solutions :<br>- From last week of June for the rest of the season: place 440048. A client of Durr has a boat (red boat) that will come out for repair. Given the yearly mooring fee of ~900CHF we reimburse her 100CHF per month.<br><br>- until end of the month:<br>The moment I liberate (my new Sunbeam) one of Durr's places (2nd from the crane) we can use that place. I will either sell my old boat this Friday (I am negotiating with a buyer) and then I can displace the Sunbeam to my old place or I will take my old boat out sometime end of next week but this is depending on the availability of Detraz and this I can only know after Friday.<br><br>Boat has been moved to second place from crane towards lake until the end of month... After this spot for a few weeks, we will have another one place (440048) which will be freed end June (approx.) for the rest of the season. This is from a client from Durr and we will be asked to pay a small fee (100CHF/month). Next year we will have the same problem without any option to get more fixed spaces | 17/06 |
| J70       | 24/05          | A lot of work has been already been done to prepare the boat, but there are still a few things that need taking care of, some of them internally among us, other with Marine Creation who delivered the boat.<br><br>The list of remaining tasks is available at <a href="https://docs.google.com/spreadsheets/d/1I7E4SlseYV_kSn6ienPzjUDcajm8zWhNhE1bcvbXWuQ/edit#gid=0">https://docs.google.com/spreadsheets/d/1I7E4SlseYV_kSn6ienPzjUDcajm8zWhNhE1bcvbXWuQ/edit#gid=0</a> | Work in progress (see google docs spreadsheet)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |       |
| Jedi      | 29/05          | Lost spinnaker barber-hauler during training.                                                                                                                                                                                                                                                                                                                                                                                                                                | New barber bought and fixed on boat.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 31/05 |
| Gipsy     | 26/05          | The boat under motor was used for exiting the port but after 100m out the engine started to                                                                                                                                                                                                                                                                                                                                                                                  | Phone to Mr Lopez: he is going to Port-Choiseul to check Gipsy out...                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 02/06 |

# 2018 YCC KeelBoats Maintenance Logbook

This is the list of maintenance tasks or repairs that have to be done on the YCC Keelboats.

- If you are willing to help on maintenance and can or feel to do the task you are are welcome.
- Once the task is done and completed, please add a short description in the column **Task Done**, fill your name and date in the column **Done by** and paint the row in grey.
- Please feel free to insert new tasks (latest = first row) with date and your name in the column **Date - Name** and a description of the task in the column **Task to Be Done**.

Voici la liste des tâches de maintenance ou des réparations à effectuer sur les quillards de notre club.

- Si vous désirez participer aux maintenances ou si vous pouvez ou désirez effectuer une tâche, votre aide est vraiment la bienvenue.
- Une fois la tâche effectuée et terminée, ajouter s'il vous plaît une brève description dans la colonne **Task Done**, ajouter votre nom et la date dans la colonne **Done by** et griser les cases.
- Si vous remarquez un problème, n'hésitez pas à ajouter une ligne au début du tableau avec la date et votre nom dans la colonne **Date - Name** et une brève description de la tâche dans la colonne **Task to Be Done**.

| Boat   | Date - Name | Task to Be Done<br>(Description)                                                                                                                                                                                                                                     | Task Done<br>(Short description)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Done by<br>(Date - Name) |

|        |             | loose power and there was smoke coming from the engine room.<br>After putting some fuel, the engine started first time. However it seems that the cooling circuit doesn't seem to be working. It definitely now needs a mechanic to check it out before further use. | After inspection, M. Lopez found that Gipsy's motor ran without cooling, for an undetermined reason (plug or foreign body at the water inlet, water valve closed by mistake, or something else) The result was a loss of coolant and several damaged parts, among which a molten (!) exhaust-gas fitting...<br>He is ordering replacement parts...<br><br>Gipsy's motor has been repaired (by Mr A. Lopez, Mécanique Navale Mobile) and can be used again.<br>Due to overheating (because it ran without cooling) its impeller (external water circuit) had molten, and he found debris stuck in many places; he had a hard time to clean the system.<br>Also the exhaust manifold (collecteur) had been damaged and has been replaced. |                          |
| Jedi   | 28/05       | No winch handle on board. One has been lost during regatta and no spare was found on board.                                                                                                                                                                          | One replacement 20cm winch handle now on board, and a second is on order. Missing barber hauler replaced.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 28/05                    |
| J70    | 24/05       | J70 has been put in the water and be moored in Port Choiseul in q-boat place.<br>A few things still need sorting out with the J70 (moorings to be readjusted, fool-proof procedures tested and documented, etc.                                                      | Preparing of the familiarisation with the boat, so that the maximum number of our club members can use her this summer!<br><br>First familiarisation outing have been done<br>Videos in preparation...                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                          |
| Jedi   | 21/05       | Pin detached that fixes main sail to main sheet                                                                                                                                                                                                                      | Temporary fixing by putting a new pin from the toolbox with some white tape around because it's too long.<br>Repair checked and ok                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 22/05                    |
| Jedi   | 21/05       | While cleaning the hull and deck, notice that the keel is damaged with a big chip at the bottom presumably from someone hitting the cement block at some point. requires repair.                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                          |
| Jedi   | 21/05       | Missing spinnaker barber-hauler pulley                                                                                                                                                                                                                               | Missing barber hauler replaced.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 28/05                    |
| Jedi   | 20/05       | Problem with motor not starting.                                                                                                                                                                                                                                     | Motor working fine. Previous problem almost certainly due to motor being stored wrong way up.<br>Other possibility carb may have had oil in it                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 22/05                    |
| Gipsy  | 17/05       | Interior should be cleaned as it's in very bad situation.                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                          |
| MicMac | 13/05       | Main sail windows has a new hole.                                                                                                                                                                                                                                    | The hole has been repaired.<br>But as it's not the first time the windows breaks, we may think if we do not need to change the window as it looks very old and crackly...                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 13/05                    |

# 2018 YCC KeelBoats Maintenance Logbook

This is the list of maintenance tasks or repairs that have to be done on the YCC Keelboats.

- If you are willing to help on maintenance and can or feel to do the task you are are welcome.
- Once the task is done and completed, please add a short description in the column **Task Done**, fill your name and date in the column **Done by** and paint the row in grey.
- Please feel free to insert new tasks (latest = first row) with date and your name in the column **Date - Name** and a description of the task in the column **Task to Be Done**.

Voici la liste des tâches de maintenance ou des réparations à effectuer sur les quillards de notre club.

- Si vous désirez participer aux maintenances ou si vous pouvez ou désirez effectuer une tâche, votre aide est vraiment la bienvenue.
- Une fois la tâche effectuée et terminée, ajouter s'il vous plaît une brève description dans la colonne **Task Done**, ajouter votre nom et la date dans la colonne **Done by** et griser les cases.
- Si vous remarquez un problème, n'hésitez pas à ajouter une ligne au début du tableau avec la date et votre nom dans la colonne **Date - Name** et une brève description de la tâche dans la colonne **Task to Be Done**.

|                                   |       |                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                              |                           |
|-----------------------------------|-------|-----------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| MicMac                            | 11/05 | On the tiller stick extension the connection piece is broken.                                                                                 | Bought a new connection piece of the tiller stick extension at Moby-Dick and changed it. <i>Note</i> that the replacement of the piece is a little tricky as you would need a drill to make a hole in the caoutchouc piece...                                                                                                                                                | 13/05                     |
| MicMac                            | 07/05 | Problem with the door lock which doesn't work well                                                                                            | Door lock arranged, so that it should be ok for some time. If not will may need to change the door lock and do a new door panel.                                                                                                                                                                                                                                             | 13/05                     |
| Jedi                              | 24/04 | Problem with rope to trim the spinnaker tack which is too short and holes in spinnaker.                                                       | Tim Foster : Small holes in spi repaired. tangled knot on spi tack undone and replaced with plastic ball. too much wind to repair small holes on genoa                                                                                                                                                                                                                       | 28/05                     |
| Jedi                              | 22/04 | Problem with motor at slow engine speed. Repair and service to be done.                                                                       | Maintenance and service done. Motor tested and OK                                                                                                                                                                                                                                                                                                                            | 25/04                     |
| MicMac                            | 21/04 | The handle to down the motor is broken                                                                                                        | Repair and service done. Motor tested and OK                                                                                                                                                                                                                                                                                                                                 | 25/04                     |
| Jedi<br>MicMac<br>MammaMia<br>J70 | 17/04 | Asking Michał for renewing the SRS certificates                                                                                               | Renewal done and paid by Michał. Need to update the CERN web site documents.<br><br>02/07 CERN Website documents updated                                                                                                                                                                                                                                                     | 02/07                     |
| Gipsy                             | 16/04 | New licence numbers for GS are needed.                                                                                                        | Licence numbers have been put on keel.                                                                                                                                                                                                                                                                                                                                       | 29/09                     |
| Gipsy                             | 16/04 | To inspect the boat and to ask GibSea users if any maintenance work is urgent this year. To figure out budget split between Aquila and GibSea |                                                                                                                                                                                                                                                                                                                                                                              |                           |
| Jedi                              | 13/04 | Asked Arnaud of Top Voiles to check J80 sails                                                                                                 | 15/06 : Tested new regatta sails and the rat spi with Arnaud. He will modify jib otherwise all good.                                                                                                                                                                                                                                                                         | Tim Foster<br>Haude Morel |
| Jedi                              | 13/04 | Zipper for mainsail cover does need to get replaced                                                                                           | Mainsail cover repaired ad back on boat.                                                                                                                                                                                                                                                                                                                                     | 01/05                     |

| Edel                              | 20/03 | Getting rid of the boat to prepare the place for the new J70. Should ask the committee whether to sell it or to scrap it directly.            | Capitainerie doesn't agree with replacing Edel by J/70 by a lack of available space. Gijs de Rijk is to trying to propose a new solution a solution to put J/70 on Q-boat place and Q-boat on Edel's place.<br><br>J/70 has been moored in Port Choiseul. It is currently at the Q-Boat place. This arrangement is still waiting for the confirmation from the Capitainerie. | 24/05                     |

# 2018 YCC KeelBoats Maintenance Logbook

This is the list of maintenance tasks or repairs that have to be done on the YCC Keelboats.

- If you are willing to help on maintenance and can or feel to do the task you are are welcome.
- Once the task is done and completed, please add a short description in the column **Task Done**, fill your name and date in the column **Done by** and paint the row in grey.
- Please feel free to insert new tasks (latest = first row) with date and your name in the column **Date - Name** and a description of the task in the column **Task to Be Done**.

Voici la liste des tâches de maintenance ou des réparations à effectuer sur les quillards de notre club.

- Si vous désirez participer aux maintenances ou si vous pouvez ou désirez effectuer une tâche, votre aide est vraiment la bienvenue.
- Une fois la tâche effectuée et terminée, ajouter s'il vous plaît une brève description dans la colonne **Task Done**, ajouter votre nom et la date dans la colonne **Done by** et griser les cases.
- Si vous remarquez un problème, n'hésitez pas à ajouter une ligne au début du tableau avec la date et votre nom dans la colonne **Date - Name** et une brève description de la tâche dans la colonne **Task to Be Done**.

| Boat      | Date - Name | Task to Be Done<br>(Description)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Task Done<br>(Short description)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Done by<br>(Date - Name) |

| MicMac    | 20/03       | Inspection of the deck.<br>Special attention to be payed to the state of the deck as it is degrading. Should decide what to do. Professional intervention will be expensive. How much can we do by hand?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                          |
| Aquila    | 20/03       | Measure the boat for racing (SRS) and get the certificate once the new spinnaker has been bought.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                          |
| Aquila    | 20/03       | Buying a spinnaker for the boat, installing spinnaker pole, topping lift, changing spi halyard.<br>To start with a quote from Arnaud. Does not need to be racing spi, just reasonable sail. Aim - to make a B'd'Or outing for beginners on a big boat.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Quote for the pole and installation requested from Arnaud. Waiting for the answer.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                          |
| MicMac    | 20/03       | Once Mamma Mia is again in water, take MicMac out of water, let it dry for 2-3 weeks and put 1-2 layers of antifouling after that                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                          |
| Mamma Mia | 20/03       | <b>Big post winter maintenance:</b> <ul style="list-style-type: none"><li>• Inspection of the hull</li><li>• Inspection of the rudder as it has a small structural damage and decide what to do</li><li>• Inspection of the edge on the back (jupe arriere), where the engine is attached, is tired and full of small cracks and decide what to do</li><li>• To clean dirt and remaining antifouling off the hull</li><li>• To inspect the keel joint and fill the gap if needed (looks not needed)</li><li>• Apply one layer of VCTar all around the hull (1 layer to even the coating)</li><li>• Apply a couple of layers of antifouling</li><li>• Change of the big spinnaker fitting.</li><li>• Small epoxy repairs to rudder which we think we can also adjust so that it does not hit the hull</li></ul> | <p>Boat inspected, brought back to BA5 barrack. Mast put down and inspected. Started cleaning antifouling on the hull.</p> <p>On 25/4/2018 less than 10% done. All repair material ordered or purchased.</p> <p>On 27/4/2018 some 30-40% of hull cleaning is done. Broken mast pully ordered from Sechaud.</p> <p>On 05/05/2018 60-70% of hull cleaned. Waiting for a delivery date for the broken mast pully.</p> <p>On 08/05/2018 95% of hull cleaned. To be washed and finished for forgotten spots.</p> <p>Boat ready for application two coats of VC TAR2 and then two coats of VC17m.</p> <p>On 04/06/2018: 2 layers of antifouling finished to be painted.</p> <p>On 06/06/2018: The boat has been brought back to Port Choiseul and put in a temporary mooring place.</p> <p>Mast is up but rig tensioning still to be done...</p> <p>On 07/06/2018: boat rigged and tested not ready yet. sail ok. need tightening shroud. mast cable connected. mast light not working.</p> | 08/06                    |

# 2018 YCC KeelBoats Maintenance Logbook

This is the list of maintenance tasks or repairs that have to be done on the YCC Keelboats.

- If you are willing to help on maintenance and can or feel to do the task you are are welcome.
- Once the task is done and completed, please add a short description in the column **Task Done**, fill your name and date in the column **Done by** and paint the row in grey.
- Please feel free to insert new tasks (latest = first row) with date and your name in the column **Date - Name** and a description of the task in the column **Task to Be Done**.

Voici la liste des tâches de maintenance ou des réparations à effectuer sur les quillards de notre club.

- Si vous désirez participer aux maintenances ou si vous pouvez ou désirez effectuer une tâche, votre aide est vraiment la bienvenue.
- Une fois la tâche effectuée et terminée, ajouter s'il vous plaît une brève description dans la colonne **Task Done**, ajouter votre nom et la date dans la colonne **Done by** et griser les cases.
- Si vous remarquez un problème, n'hésitez pas à ajouter une ligne au début du tableau avec la date et votre nom dans la colonne **Date - Name** et une brève description de la tâche dans la colonne **Task to Be Done**.

| Boat         | Date - Name | Task to Be Done<br>(Description)              | Task Done<br>(Short description)                                                                                                                                                                                                                                                                                             | Done by<br>(Date - Name) |
