

## Play your own Tracks as a DJ

**REQUIRES THE [XML INJECTOR MOD](#)!**

### Play your own Tracks as a DJ

You'll find the new Option "Play Track" (see Picture below) on DJ Booths which let's you play your own Tracks! (Get Together & Get Famous needed)

#### How this Mod works:

I like the new Tracks we can create with the Get Famous Pack but i was disappointed that i could not play them when working as a DJ at my own Club. Now i can.

You'll find the new Option "Play Track" (see Picture below) on DJ Booths which let's you play your own Tracks!

Be aware the DJ Booth needs to be off before you start the first Track or else the Animation is off. After that you can continue more Tracks without interruption.
