

Research & Design Competition Worksheet

SUSTAINABILITY is about taking care of our world so it can keep taking care of us. It means finding clever ways to reuse, share, and protect what we have, from clean air and water, to energy, food, and even our friendships and communities. Your small ideas can lead to big changes that help people, animals, and nature live well together.

This is your chance to dream up designs that make life fairer, kinder, and more balanced — ideas that help families, schools, neighborhoods, and the whole planet thrive.

Think of a smart thing, new rule, or creative technology that could keep our Earth strong, our communities caring, and our future full of possibilities.

My smart thing / technology is called: _____

It looks like this (drawing):

A large, empty rectangular box with a black border, intended for a drawing of the smart thing or technology described in the previous section.

It works like this (explanation):

Two horizontal lines within a rectangular box, intended for a written explanation of how the smart thing or technology works.
