recycle
By: Malika Sheikh

Did you recycle before ? If you didn't recycle then do it ! You should recycle because it is important for the city and the people in the city.

Big recycle bin

Another reason is if you are recycling you are spending money on one thing . If you are don't recycle you are spending money on more things.

Recycle bins

One reason why it is important to recycle because it is polluting the air and it is not good for the city. When you throw the trash on the floor it will smell bad and then it will be polluting the air .

Did you recycle? I hope so. Also tell your family and remind others to recycle because it is important. So you see this is why it is important to recycle. You can recycle by helping others and teaching them how to recycle.

To continue it is important to recycle. For example, collect cans, bottles, and paper and put them in the recycle bin. Use pictures to help you label the bin.glass and plastic can be recycled.

People may say not to recycle because they don't like recycling and they are mean. I think people think it is not important to recycle. This is not a good reason because people should recycle. Recycling is more important for the earth because then we are not polluting the air and the earth.
