ABSTRACT

The abstract must reflect the substance of the whole contents of the article and help readers determine its relevance to their interests and decide whether or not to read the full document. **The abstract consists of a statement about the background, objective of the study or focus of discussion, method or important research steps, findings, novelty/originality of this study, and conclusion.** The title and abstract are written in English, each in one paragraph, single spacing, Book Antiqua font size 10, and in total about 200-250 words. The abstract should stand alone, meaning that there are no citations in the abstract. [Book Antiqua 10 pt, aligned left and right, spacing 1.0]

INTRODUCTION

This section should briefly provide information on the **background** (problem identification, explanation of why this topic is important and relevant), **literature review and research gap** (recent developments in this field highlight gaps in knowledge that need to be addressed through this research), **rationale of the study, the hypotheses, and the objectives of the study**. [Book Antiqua 12 pt, aligned left and right, spacing 1.0]

METHODS

This section describes the overall research methods used in the research process. It should identify the types of research, the study variables, the research subjects, the research instruments (including their names, item numbers, and reliability coefficients), the data collection procedures, and the statistical analysis techniques employed. Please ensure that sufficient information is provided to guide further research. [Book Antiqua 12 pt, aligned left and right, spacing 1.0]

RESULT AND DISCUSSION

Result

This section presents the data in its simplest form, along with the results of assumption tests and hypothetical tests. The presentation is sequential and integrated, facilitating a critical analysis that directly addresses the research question and/or hypotheses. Visual aids, such as tables, charts, or pictures, are utilized to enhance the comprehensibility of the analyses. [Book Antiqua 12 pt, aligned left and right, spacing 1.0]

Figures And Tables

The relationship between the tables or figures and the text should be clear. As the tables and figures supplement the text, they should all be referenced in the text. Authors must also explain what the readers should look for when using the tables or figures. All tables and figures must be referenced using APA 7th edition standards.

Example:

Table 1

Variable	Collinearity statistic		
	Tolerance	VIF	Description
Islamic religiosity	0.459	2.178	No Multicollinearity
Perceived Behavior Control	0.459	2.178	

Note: [Book Antiqua, 9-10 pt, spacing 1.0]

Table 2

No	Sex	Number	Percentage
1	Female	198	51.2
2	Male	189	48.8
Total		387	100

Figure 1

Graph of Mean Aggressiveness of Experimental and Control Groups in the Initial and Final Tests. Note: [Book Antiqua, 9-10 pt, spacing 1.0]

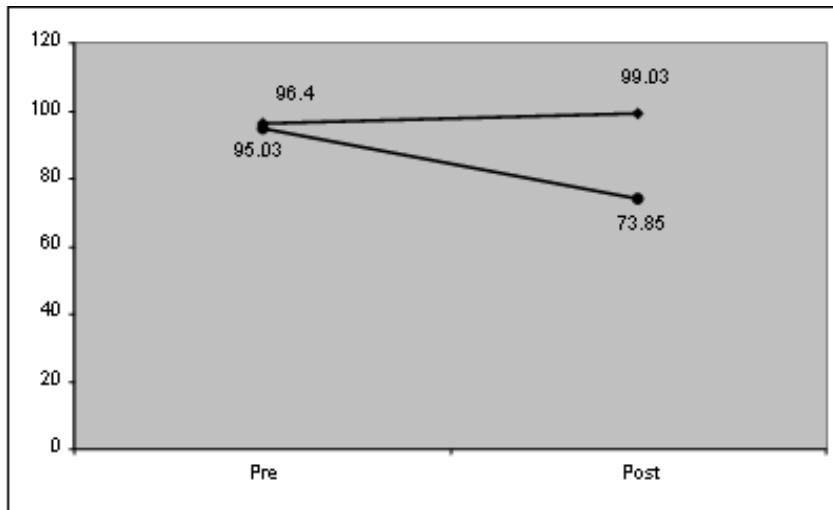

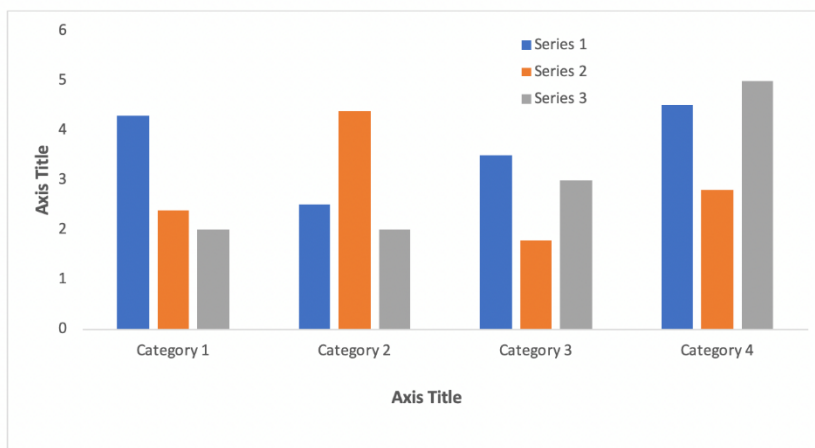

Figure 2

Discussion

This section should provide an explanation of the research results in relation to those of previous studies. It should be critically analyzed and linked to the relevant current literature, giving substantial meaning to the analysis results and providing a comparison with the findings of previous studies. Additionally, this section should highlight the implications of the findings and address the strengths and limitations of the study. It is essential to avoid mere repetition of the results section. [Book Antiqua 12 pt, aligned left and right, spacing 1.0]

CONCLUSIONS

This section presents the main conclusions of the study. They should be presented in concise, clear, and compact sentences based on the results and discussions, in the form of paragraphs (not with bullet points or numbering). It

should clarify the findings of the study as a synthesis of the results of the data analysis and discussion and highlight original findings that contribute to the development of Islamic educational psychology. Additionally, this section should emphasize the implications of the findings, such as suggestions for future research or policy recommendations. [Book Antiqua 12 pt, aligned left and right, spacing 1.0]

REFERENCE

The reference list should contain full details of all the references cited in the text of the article. We expect a minimum of 30 references from relevant and high-quality sources. It is recommended that these references be from the last 10 years and listed in alphabetical order following the American Psychological Association Referencing Style (7th edition). For detailed guidelines, please refer to <https://apastyle.apa.org/products/publication-manual-7th-edition>.

All the references listed must be cited in the text, and all text citations should be included in the reference list. If available, a DOI for each reference must be provided. We suggest using reference manager programs such as Mendeley or Zotero to manage your references efficiently.
