

How to move VM by PowerCLI

Jing, mqjing@gmail.com

Move-VM -vm <your-vm> <target ESXi host IP>

ex:

move-vm -vm v1 192.168.1.102

```
PowerCLI C:\Users\work\Desktop\script\benchmark\virutal-desktop> move-vm v1 192.168.1.102
```

Name	PowerState	Num CPUs	MemoryGB
v1	PoweredOn	2	2.000

total time

```
$global:creation_start_time = Get-Date
```

```
move-vm -vm v1 192.168.1.102
```

```
$global:total_runtime = $(Get-Date) - $global:creation_start_time
```

```
Write-Host "Total time elapsed: $global:total_runtime"
```
