Megan is a Principal and Senior Consultant with Jacobs Advance Planning Group. For 20 years, she has been involved in the pre-design, planning and design of projects from bespoke research & development campuses to detailed program requirements for accommodation worker villages supporting up to 60,000 employees. Her responsibilities include establishing project vision, strategy, and program requirements, as well as the development of physical design solutions. Today she spends much of her time working with clients to make sure their real estate assets align with the mission and needs of the companies and communities they serve. Her ability to listen, analyze complex data, organize tasks and communicate effectively results in successful project outcomes that reflect the client's vision and objectives.

A native Houstonian she relocated to Atlanta after receiving her Bachelor of Landscape Architecture from Texas A&M University and hasn't quite found her way back to the Lone Star State yet. She is currently pursuing a Master of Science in Biomimicry from Arizona State University.
