Notable players without a team

***Note:**

- ❑ Some profiles may be set to private. I apologize in advance.

Donate to me (if you want, please do not feel obligated in any way - it only took me a lot of hours to do this):

<https://steamcommunity.com/tradeoffer/new/?partner=102161349&token=lrUoKsSs>

If you want me to add a team or have any suggestions as to how to update this list, message me on reddit [/u/lil_ej_from_dr](#) or comment on this [post](#)

I might alphabetize the teams AND the players if enough people ask me to! I am also planning on making the private profiles red!
