

NZSA Share Game

Overview

The NZSA Share Game is an online share game that mimics how you buy and sell shares on real platforms such as Sharsies or ASB Securities, it can be used from a PC, MAC, tablet or phone.

The Share Game allows trading in all shares on the New Zealand, Australian, American and some other markets.

Each participant gets NZD \$10,000 of virtual cash they can use to "buy" shares listed on the available exchanges. They do this from their dedicated home page where they can buy and sell shares and see the value of their portfolio in almost real time (prices are 20 minutes delayed from actual market prices).

Each buy or sell will cost 0.3% of the buy/sell amount in virtual cash for brokerage. Net dividends are credited to each portfolio's virtual cash account on their payment date.

Each night at 6pm the games leaderboard is updated with each participant's net worth (market value of shares, cash in bank and unpaid dividends owing) ranked from highest to lowest.

The winner is the portfolio that is worth the most (cash plus value of shares) at 6pm on the closing date of the Share Game.

You can do nothing and leave it all as cash, buy an index, trade like a maniac, or any strategy you like. There are no limits other than the amount of virtual cash you have left to play with.

Using the game

To make it easy to use we provide a personal home page where you buy and sell shares and the excellent people at Sharesight have provided unlimited free portfolios which the Share Game uses to track the buys and sells and the performance of each portfolio - they can do it

much better than we can! Your sharegame home page has a link to your Sharesight portfolio so you can use Sharesight to monitor and report your holdings and use the Share Checker for investments you are considering. Your home page also has a link to the Leaderboard which shows how all the portfolios are doing - don't worry we don't show names, just numbers or an optional display name you select when you register for the game.

Logging on

When the share game is ready to go you will receive an invitation from Sharesight to logon to your personal share game homepage. The email will come from Sharesight so keep an eye out for it and if you don't receive it check your spam folder. The email will look like this:

YES

After you have placed your order you are taken back to your home page.

Your buy order will remain in a Created state for 20 minutes from the time you submit it. After 20 minutes it becomes On market and will be processed when the offer price (lowest price some is currently prepared to sell at) is less than or equal to your buy price limit (if you set a limit) AND the daily volume traded is equal to or greater than your order quantity. We do these checks as in real life some low price shares are quite illiquid and can't be purchased in large quantities.

Orders are only processed during market hours (adjusted for the 20 minute delay) but may be cancelled at any time from the home screen.
