

Test Report for HNG Website

Website URL: <https://hng.tech/>

Introduction

I explored the website (HNG) in good fields to identify bugs or inconsistencies. Here are a few defects documented in a clear approach.

Functionalities Overview

1. Homepage Navigation:

Clear and user-friendly with internship, learning, networking, and hiring sections.

2. Program Information:

Detailed descriptions of various programs (Internship, Learn, Network).

3. Talent and Client Sections:

Dedicated areas for both talent acquisition and client services.

4. Testimonials:

User experiences and success stories are displayed prominently.

5. Contact and Support:

Accessible links to contact forms and support services.

Bugs and Issues

- Homepage:** the white text under the “Welcome to HNG” is obscured by the overlapping white cloud design in the background. This issue affects readability and should be addressed to ensure a better user experience.
- Homepage Text in White:** The HNG mission text on the homepage lacks visual hierarchy due to the white color chosen. A more suitable option would be a shade of black, which would enhance readability and emphasize the message.
- Homepage/ Learn More Button:** The “Learn More” button lacks interactivity to indicate that it’s a clickable element.
- Homepage/ Learn More Button:** The “Learn more” button only responds when the page is freshly loaded; subsequent clicks do not trigger any action. This behavior should be addressed to ensure a consistent and responsive user experience.
- Homepage Toggle Button:** The toggle button on the homepage is non-clickable. Positioned prominently, it serves no noticeable purpose and could confuse users. This issue should be addressed for a more user-friendly experience.

6. **Homepage/HNG Empowering Text:** “The ‘HNG empowering’ text is barely visible on mobile; you can hardly see the ‘ng’ at the end.
7. **Homepage/ HNG floating Balloons:** The hot air balloons visible on the web application homepage do not appear on the mobile application. Is this intentional? perhaps for optimization?

Conclusion

The HNG website provides a nicely organized and user-friendly platform. It covers everything from internships and learning programs to networking opportunities and client services. However, some issues need attention to enhance the overall user experience.
