

Episode 224

Call of Duty Black Ops 6 has a new pay to win audio tier using customized Head Related Transfer Functions. Cool tech, but what isn't cool is allowing some players who can afford a subscription to have a gameplay advantage.

Netflix are saving the Anime industry by... *checks notes* paying the animators a fair wage. This utterly insane idea will hopefully lead the industry in a better direction, away from child labour and exploitative practices.

Aureispira bacteria have been witnessed using grappling hooks and cannons to hunt unsuspecting prey. These pirates of the microscopic world scenario could lead to interesting nanobot technology.

A star is born! On this day in 1978 (in the U.S.), The Wiz took audiences on a slightly different trip to the Emerald City. Joel Schumacher worked on this adaptation of the L. Frank Baum novel, and Sidney Lumet directed. The film starred Diana Ross, Michael Jackson, and Nipsey Russell. According to our friends at IMDB.com, here's the plot summary:

"24-year-old kindergarten teacher Dorothy, born, raised, and still working in Harlem, is celebrating Thanksgiving with her extended family, but she doesn't seem to be thankful for much. She lives a sheltered life and is shy and unfulfilled. When she gets caught in a snowstorm while chasing her dog Toto, they're transported to the mysterious Land of Oz, where she's informed that the only way she can find her way home is through the assistance of the powerful wizard in the Emerald City. As she searches for him by easing down the Yellow Brick Road, she befriends some creatures who face problems in their lives. In their quest to find the wizard, they also face Evillene, the equally evil sister of Evermean, the wicked witch whom Dorothy inadvertently killed when she arrived in Oz; Evillene might be their biggest obstacle."
