

Bounty Proposal: [TITLE OF PROPOSAL]

Proponent: [Kusama Address] *(Consider using the identity module on your address before submission of proposal, this allows more certainty on the voting process)*

Date: DD.MM.YYYY

Requested allocation:

Proposed Curator reward:

Short description:

1. **Context of the bounty:** we aim to have as much context as possible, please include here:
 - a. any points discussed in advance in any channel related to the bounty proposal and background research for your project.
 - b. The central topic of the bounty, in which of the general categories does the bounty needs to be included. If the category does not exist, please include the information here.
2. **Problem statement:** what problem is this proposal trying to solve? If no problems are being solved, which topics does the bounty cover? Make it as granular as possible to allow token holders to understand the logic behind it.
3. **Proposal Objective/solution/s to point 2:** What is the goal of the bounty? What does 'success' look like?

Please add high level objectives and success factors. Assign an informed budget. Explain what your solution is after taking into consideration the context and the problem. Make sure to consider all points included in the problem statement to ensure a complete and balanced scope, and try to be as granular as possible.

- a. Include milestones, tasks, or specific goals of the bounty if any;
- b. Include tools used to develop the tasks, if any;
- c. Try to quantify the milestones: this will give you a more accurate idea of the total allocation to be requested;
- d. If possible include a budget proposal on the bounty.
- e. Include how many people you estimate will work on this bounty, including the curator.
