

LIONS FINANCIAL

Position: Business Analyst

About Us: Lions Financial is an independent, full-service, financial services and business advisory firm which delivers integrated solutions for businesses and individuals. We offer independent, non-captive, fee-based services. This frees us to focus on preparing customized wealth management solutions to better serve each of our client's unique needs and wants. For businesses, we provide advice and proper courses of action for business planning, business continuity, and risk management initiatives. Additionally, we help companies navigate capital markets and plan for business growth or corporate exits. For individuals, we offer advice for financial plans, asset management, retirement income, and insurance services. Our mission is to provide our clients with a company that is committed to their best interest when planning for their future.

Summary of Position: Our Business Analyst Internship is an accelerated opportunity to experience a corporate setting. The intern will be working cross-functionally to define meaningful success metrics for the company. You will be assigned a senior mentor who will get you up to speed quickly so that you can learn as much as possible and contribute to the success of the team. Our professional, goal-oriented internship program is designed to prepare you for various aspects of Business Analysis. This program consists of intensive hands-on training and focuses on teaching you the skills to be successful in this domain. If you are looking for an opportunity to gain experience in the field, this is a great stepping stone and earns you real-world experience!

Responsibilities:

- Define meaningful success metrics for the company by using statistical analysis and data mining techniques.
- Assist the team with fixed income and equities research projects, as directed.
- Maintain and enhance the group's existing quant infrastructure, function library, data, and databases.
- Assist senior analysts with the construction, enhancement, and testing of multi-factor models.
- Build a database of macroeconomic factors by collecting data from a variety of third-party data sources.
- Research different optimizers across various tracks and present the findings to the team.
- Special projects as assigned.

Qualifications:

- Proficiency in Microsoft Office Suite
- Strong organizational, problem-solving, and analytical skills
- Excellent written and verbal communication skills
- Proven ability to handle multiple projects and meet deadlines
- Ability to work independently and in teams
- Ability to quickly absorb new technical concepts and tools
