

1. Ultra-Realistic Nano Banana 2 and Kling 3.0 Prompts

Start Frame Prompt:

"Ultra-realistic macro product photography of a \$15,000 luxury espresso machine sitting on a midnight-black Marquina marble countertop. Polished dark chrome paneling, brushed copper accents, brightly illuminated analog pressure dials. Low moody ambient lighting with volumetric studio spotlights hitting reflective metal surfaces. Shot on 85mm lens, f/1.8 shallow depth of field. Deep contrast, photorealistic textures, dark luxury aesthetic, 8k resolution."

End Frame Prompt:

"Ultra-realistic macro photography of a luxury espresso machine on midnight-black marble countertop in dynamic 'exploded view'. Dark chrome side panels and top chassis levitating outward, exposing glowing copper boilers, steel braided hoses, precision mechanical valves. Perfect dark espresso with golden crema dripping into ribbed crystal glass. Cinematic spotlighting on internal copper mechanics, photorealistic, 8k resolution."

Video Generation Prompt:

"Slow, cinematic, buttery-smooth 3D transition **exactly 10 seconds long**. Begin fully assembled luxury espresso machine in moody studio lighting. Smoothly pan camera 15° right while dark chrome side panels/top chassis mechanically glide outward into suspended exploded view. Light hits internal copper boilers (they gleam). Conclude with macro focus on slow-motion espresso drip into glass. 15fps, seamless loop potential."

Prompt to Build Website 👍

Claude Code Prompt

You are a **senior frontend engineer and premium UI architect**.

Read the **two .md skills** in the **.claude** folder and follow their design and implementation guidelines.

Build a **modern, luxury one-page product landing page** for a premium espresso machine.

Tech Requirements

- **Vanilla HTML, CSS, and JavaScript**
- Smooth **scroll-driven animations**
- Clean, production-quality structure
- Fully **responsive**

Assets

- Video: `Luxury_espresso.mp4`
- Frames: `/frames/frame_0001.png` → `/frames/frame_0150.png` (150 PNG frames)

Use the frames to create a **scroll-driven product animation** where the frame sequence progresses as the user scrolls.

Design Style

- **Dark mode only** (deep black background)
- **Luxury, cinematic, minimal aesthetic**
- Espresso machine visuals should **blend into the background** so the entire page feels like **one fluid experience**
- Typography must be **clean and highly readable**
- Use **Clash Display for headings** (as defined in the `premium-ui-architect` skill)

Animations

Implement **premium smooth animations**:

- Scroll-based frame animation
- Fade-ins and reveal effects
- Subtle parallax
- Smooth section transitions

Animations should feel **high-end and fluid**, not distracting.

Page Structure

Hero Section

- Large “**PERFECT POUR**” heading (align left)
- Cinematic background using the **espresso-machine.mp4 video**
- Subtle scroll transition into the frame animation

Scroll Product Animation

Use the **150 PNG frames** to create a **scroll-controlled animation sequence** showing the espresso machine.

Feature Sections

Create **5 feature sections** alternating **left/right layout**.

Highlight:

- Copper Boiler
- 9-Bar Pressure System
- Precision Engineering
- Temperature Stability
- Premium Build Quality

Each section should include:

- Short headline
- Concise description
- Smooth scroll reveal animation

Pinned Stats Section

Add a **pinned section with animated counters** synchronized with scroll.

Example stats:

- 9 Bar Pressure
- $\pm 1^{\circ}\text{C}$ Temperature Precision
- 30s Heat-Up
- 58mm Professional Portafilter

Final Section

At **~95% scroll**, trigger an **email waitlist modal** with:

- Email input
- CTA button
- Minimal premium styling

Additional Requirements

- Semantic HTML
- Clean modular JS
- Optimized scroll performance
- Smooth scrolling experience
- Luxury Apple-style product presentation

The final result should feel like a **high-end cinematic product website for a luxury espresso brand**.
