

PLAY BETTER CHESS!

Whether you're a complete beginner or an experienced player, there is still a lot to learn about the game of chess. So many openings, so many tactics and strategies, so many famous games to learn from. I have been playing and teaching chess for over fifty years, and still learn a new concept almost every day.

My name is Larry Galpert. I'm a clinical psychologist in SLO, and I love teaching chess to kids and adults of all ages. I offer group classes and individual lessons at very affordable rates. If you'd like to improve your chess skills and understand the game at a deeper level, please get in touch!
