Georgia FCCLA Knowledge Bowl Questions

Nutrition and Food Science and Culinary Arts

What is nutrition?

Nutrition is the process of getting the right food that our bodies need to grow, be healthy, and have energy.

Why is breakfast important?

Breakfast gives us the energy we need to start the day and helps us concentrate in school.

Why do we need carbohydrates?

Carbohydrates give us energy and help our brain work.

What foods are good sources of carbohydrates?

Bread, rice, pasta, and fruits.

What do proteins do for our bodies?

Proteins help us grow, repair our bodies, and stay healthy.

Name some protein-rich foods.

Chicken, fish, eggs, and beans.

Why do we need fats?

Fats store energy and help our bodies absorb vitamins.

What are healthy fats?

Healthy fats come from foods like avocados, nuts, and olive oil.

What is a calorie?

A calorie is a unit that measures how much energy a food gives us.

Why is it important to drink water?

Water helps our bodies stay hydrated and work properly.

What is a balanced diet?

A balanced diet includes a variety of foods from all food groups in the right amounts.

What are vitamins and minerals?

Vitamins and minerals are nutrients that help our bodies stay healthy.

What vitamin do we get from the sun?

Vitamin D.

Why is fiber important in our diet?

Fiber helps our digestion and keeps our digestive system healthy.

What is a serving size?

A serving size is the amount of food recommended for one person to eat.

What is a food group?

A food group is a category of foods that share similar nutrients.

Name the five food groups in MyPlate.

Fruits, vegetables, grains, protein, and dairy.

What are empty calories?

Empty calories come from foods and drinks that have a lot of calories but not many nutrients.

What is a food label?

A food label tells us what's in a food and how many calories it has.

What does "organic" mean on a food label?

Organic means the food was grown without chemicals.

Why is it important to wash your hands before eating?

Washing hands helps prevent the spread of germs and keeps our food clean.

What is a food allergy?

A food allergy is when our body reacts badly to a certain food.

What is a vegetarian?

A vegetarian is someone who doesn't eat meat.

What is food science?

Food science is the study of how food is made, how it stays fresh, and how our bodies use it for energy.

What is a food allergy?

A food allergy is when our body reacts badly to a particular food, causing symptoms like itching or swelling.

What is food preservation?

Food preservation is the process of keeping food fresh for longer periods to prevent spoilage.

How do refrigerators help preserve food?

Refrigerators keep food cold, which slows down the growth of bacteria and helps food last longer.

What is freezing as a food preservation method?

Freezing food helps to keep it fresh by stopping bacteria from growing.

What is a recipe?

A recipe is a set of instructions that tells you how to prepare a specific dish.

What is culinary arts?

Culinary arts is the art of cooking and preparing food.

What is the difference between a cook and a chef?

A cook is someone who prepares food, while a chef is a highly skilled and trained professional cook.

What are the five basic tastes in food?

Sweet, sour, salty, bitter, and umami.

What is umami?

Umami is a savory taste often described as meaty or brothy.

Why is presentation important in culinary arts?

Presentation makes food look more appealing and appetizing.

What is mise en place?

Mise en place means "everything in its place" and refers to preparing and organizing ingredients before cooking.

What is the difference between baking and roasting?

Baking usually involves dry heat, while roasting typically involves cooking with fats and oils.

Why is it important to wash hands frequently while cooking?

Washing hands helps prevent the spread of germs and keeps food safe.

What is a sauté pan used for?

A sauté pan is used for cooking food quickly in a small amount of oil or butter.

What is a colander, and when is it used?

A colander is a bowl with holes used to drain liquids from food, such as pasta.

What is a marinade used for in cooking?

A marinade is a flavorful liquid used to soak and flavor meat or vegetables before cooking.

What is a blender used for in the kitchen?

A blender is used to mix and puree ingredients, often for making smoothies or soups.

What is a pastry brush, and when is it used?

A pastry brush is used to apply liquids like egg wash or glaze to pastries and baked goods.

Why do some recipes call for preheating the oven?

Preheating ensures that the oven is at the right temperature when you start cooking.

What is the purpose of a food processor?

A food processor is used to chop, slice, and blend ingredients quickly.

What is a whisk used for in cooking?

A whisk is used for mixing and incorporating air into ingredients, like eggs or cream.

What is a simmer in cooking?

Simmering is cooking food gently at a temperature just below boiling.

What is the difference between grilling and broiling?

Grilling is cooking over an open flame or heat source, while broiling is cooking from above with direct heat.

What is a double boiler, and when is it used in cooking?

A double boiler is used for gentle heating and melting of ingredients like chocolate or custard.

What is a cutting technique called "mincing"?

Mincing is finely chopping food into tiny pieces.

What is the purpose of a food scale in the kitchen?

A food scale measures ingredients accurately, which is crucial in baking and cooking.

What is the difference between poaching and boiling?

Poaching involves cooking food gently in simmering liquid, while boiling is cooking in rapidly boiling water.

Why is it essential to use oven mitts when handling hot dishes from the oven?

Oven mitts protect your hands from burns when handling hot cookware.

What is a zester, and when is it used?

A zester is a tool used to remove the zest or outer peel of citrus fruits for flavoring.

What is a food thermometer used for in cooking?

A food thermometer checks the internal temperature of food to ensure it's safe to eat.

What is cross contamination, and how can it be prevented?

Cross contamination is the transfer of harmful bacteria from one food or surface to another. It can be prevented by washing hands, using separate cutting boards for raw meat and produce, and sanitizing kitchen surfaces.

What is the temperature danger zone for food?

The temperature danger zone is 40°F to 140°F , where bacteria grow most rapidly.

Why is it important to let meat rest after cooking?

Resting allows the juices to redistribute throughout the meat, making it more flavorful and helping it retain moisture.

What is the purpose of the “Best if Used By” date on food packaging?

It indicates when a product is expected to be at its best quality or flavor and is *not* a safety date.

Why is it important to calibrate a food thermometer?

Calibrating a food thermometer ensures it gives accurate temperature readings, helping prevent undercooked or overcooked food and reducing the risk of foodborne illness.

Child and Family Development & Education as a Profession

What is child development?

Child development is the process of growth and change that happens from birth through adolescence.

What are developmental milestones?

Developmental milestones are skills or abilities that children should reach at specific ages.

Name some physical milestones in a baby's first year.

Rolling over, crawling, and taking their first steps.

What is cognitive development?

Cognitive development is how children learn, think, and solve problems.

What is social development?

Social development is how children learn to interact with others and build relationships.

What is emotional development?

Emotional development is how children understand and manage their feelings.

What is the importance of early childhood development?

Early childhood development sets the foundation for a child's future learning and behavior.

What is language development?

Language development is the process of learning to understand and use language.

Why is reading to a child important for their development?

Reading to a child helps them develop language skills and a love for learning.

What is the "terrible twos"?

The "terrible twos" is a stage where toddlers often become more independent and may have temper tantrums.

What is the difference between fine motor and gross motor skills?

Fine motor skills involve small movements like picking up small objects, while gross motor skills involve large movements like running and jumping.

What is self-esteem?

Self-esteem is how a person feels about themselves and their abilities.

What are social skills?

Social skills are the abilities to interact with others effectively and make friends.

What is discipline in child development?

Discipline is teaching children right from wrong and helping them learn to make good choices.

What is parallel play?

Parallel play is when children play alongside each other but don't interact directly.

What is empathy?

Empathy is the ability to understand and share the feelings of others.

Why is it important for children to have routines?

Routines help children feel safe and know what to expect each day.

What is the role of a caregiver in a child's development?

Caregivers provide love, support, and guidance to help children grow and learn.

What is child abuse, and why is it harmful?

Child abuse is when a child is mistreated, and it can cause physical and emotional harm.

What is positive reinforcement in parenting?

Positive reinforcement is praising and rewarding good behavior to encourage it.

What are the stages of Erikson's theory of psychosocial development?

Trust vs. Mistrust, Autonomy vs. Shame and Doubt, Initiative vs. Guilt, Industry vs. Inferiority, Identity vs. Role Confusion.

What is the importance of positive role models in child development?

Positive role models can inspire and guide children to make good choices.

What is the "nature vs. nurture" debate in child development?

It's a debate about whether genetics (nature) or the environment (nurture) has a greater influence on a child's development.

What is the role of play in child development?

Play helps children learn, develop creativity, and build social skills.

Why is it important to praise effort rather than just success?

Praising effort encourages children to keep trying and learning.

What is emotional intelligence, and why is it important?

Emotional intelligence is the ability to understand and manage one's own emotions and those of others.

What is the "attachment theory" in child development?

Attachment theory suggests that strong emotional bonds with caregivers are essential for a child's emotional and social development.

Who is considered the "father of modern education"?

John Dewey.

What is the main idea of John Dewey's educational philosophy?

Learning should be hands-on and based on real-life experiences.

Who is known for the theory of multiple intelligences?

Howard Gardner.

What are some of Howard Gardner's multiple intelligences?

Examples include verbal-linguistic, logical-mathematical, and spatial intelligence.

What did Maria Montessori emphasize in her educational approach?

Montessori believed in child-centered learning and the importance of a prepared environment.

Who is known for the "zone of proximal development" theory?

Lev Vygotsky.

What does Lev Vygotsky's "zone of proximal development" refer to?

It's the range of tasks a child can't do alone but can do with the help of a more knowledgeable person.

What is the focus of Erik Erikson's theory of psychosocial development?

Erikson's theory explores the emotional and social development stages people go through across their lifespan.

Who is associated with the idea of "schemas" in cognitive development?

Jean Piaget.

What are "schemas" in Jean Piaget's theory?

Schemas are mental structures that help children understand and organize information.

Who proposed the idea of "attachment theory" in child development?

John Bowlby and Mary Ainsworth.

What does "attachment theory" explain?

It explains how early relationships with caregivers can impact a child's social and emotional development.

Who is known for the concept of "social learning theory"?

Albert Bandura.

What does Albert Bandura's "social learning theory" emphasize?

It emphasizes that children learn by observing others and modeling their behavior.

Who is known for the "sensitive period" concept in language development?

Eric Lenneberg.

What is the "sensitive period" in language development?

It's a time when it's easier for children to learn language, typically in early childhood.

Who developed the "theory of moral development"?

Lawrence Kohlberg.

What are the stages of Lawrence Kohlberg's theory of moral development?

Preconventional, Conventional, and Postconventional stages.

Who is known for the "ecological systems theory" in child development?

Urie Bronfenbrenner.

What does the "ecological systems theory" focus on?

It looks at how a child's development is influenced by their immediate and broader environment.

Who is associated with the "theory of cognitive development" in children?

Jean Piaget.

What are the key stages in Jean Piaget's theory of cognitive development?

Sensorimotor, Preoperational, Concrete Operational, and Formal Operational.

What did Lev Vygotsky emphasize regarding social interaction and learning?

Vygotsky believed that social interaction plays a crucial role in cognitive development.

Who introduced the concept of "emotional intelligence"?

Daniel Goleman.

What is "emotional intelligence" (EI)?

EI refers to the ability to recognize, understand, manage, and use emotions effectively.

What is the main idea behind Maria Montessori's approach to education?

Montessori education emphasizes self-directed learning and individualized instruction.

Who developed the "theory of psychosocial development"?

Erik Erikson.

What is a public school?

A public school is a government-funded school open to all students in a specific area.

What is a private school?

A private school is a school funded by tuition fees or donations, and it may have specific admission criteria.

What is a homeschool, and how does it work?

Homeschooling is when parents or guardians educate their children at home instead of sending them to a traditional school.

What is a charter school, and how is it different from a public school?

A charter school is a publicly funded school that operates independently and may have a specialized curriculum.

What is a curriculum?

A curriculum is a set of planned lessons and activities that make up a course of study.

What is a syllabus, and why is it important for students?

A syllabus is an outline of a course, including topics to be covered, assignments, and grading criteria. It helps students know what to expect.

What is a test, and why are tests given in school?

A test is an assessment tool used to evaluate students' knowledge and understanding of a subject.

What is a quiz, and how is it different from a test?

A quiz is a shorter assessment typically covering a specific topic or lesson, while a test covers a broader range of material.

What is an Individualized Education Program (IEP), and why is it important for some students?

An IEP is a personalized plan for students with disabilities, outlining their educational goals and support services.

What is gifted education, and how does it challenge advanced students?

Gifted education provides advanced coursework and opportunities for students who excel in academics or other areas.

What is scaffolding in education?

Scaffolding is a teaching strategy in which an adult provides temporary support to help a child learn a new skill, gradually removing the support as the child becomes more independent.

What is the difference between intrinsic and extrinsic motivation?

Intrinsic motivation comes from a person's own interest or enjoyment of a task, while extrinsic motivation comes from outside rewards or consequences, such as prizes or grades.

Why is developmental screening important in early childhood?

Developmental screening helps identify possible delays or concerns early so children can receive appropriate support and intervention.

What is an inclusive classroom?

An inclusive classroom is a learning environment where students of all abilities, including those with disabilities, learn together with appropriate supports and accommodations.

What is active listening, and why is it important when working with children and families?

Active listening is giving full attention to a speaker, asking clarifying questions, and responding thoughtfully. It builds trust, improves communication, and helps educators better understand the needs of children and families.

Interior / Fashion / Housing

What is interior design?

Interior design is the art and science of making the inside of a space beautiful, functional, and comfortable.

What are the main elements of interior design?

Color, space, line, form, texture, and pattern.

What is the purpose of a mood board in interior design?

A mood board helps designers plan and visualize the look and feel of a room.

What is the role of a color wheel in interior design?

A color wheel helps designers choose and coordinate colors for a room.

What is a focal point in interior design?

A focal point is the main area of interest in a room, like a fireplace or a piece of art.

Why is lighting important in interior design?

Lighting affects the mood and functionality of a space.

What is the difference between natural and artificial lighting?

Natural lighting comes from the sun, while artificial lighting is created with lamps and fixtures.

What is an open floor plan in interior design?

An open floor plan is a design where rooms flow into one another without many walls.

What does "ergonomics" mean in interior design?

Ergonomics is the study of how furniture and spaces can be designed for comfort and efficiency.

Why is furniture arrangement important in interior design?

Proper furniture arrangement makes a room functional and inviting.

What is the purpose of textiles in interior design?

Textiles like curtains and pillows add texture and color to a space.

What is the difference between curtains and drapes?

Curtains are lighter and more casual, while drapes are heavier and more formal.

Why is it important to consider the durability of materials in interior design?

Durable materials last longer and require less maintenance.

What is the "golden ratio" in interior design?

The golden ratio is a mathematical proportion that's pleasing to the eye and is often used in design.

What are accent walls in interior design?

Accent walls are walls that are painted or decorated differently from the rest to create a focal point.

Why should designers consider the function of a space when designing it?

The function of a space determines how it's used and what furniture and features are needed.

What is the importance of balance in interior design?

Balance ensures that a room feels harmonious and not too heavy on one side.

What is a color scheme in interior design?

A color scheme is a set of colors that work well together in a room.

Why is it essential to consider the size of furniture in a room?

Furniture that's too large or too small can make a room feel cramped or empty.

What is a design concept in interior design?

A design concept is a central idea or theme that guides the design of a space.

Why is it important to measure a room accurately before designing it?

Accurate measurements ensure that furniture and decor fit well in the space.

What is the purpose of a design sketch or floor plan?

A design sketch or floor plan helps visualize the layout and placement of furniture.

What are sustainable materials in interior design?

Sustainable materials are eco-friendly and don't harm the environment.

What is a "traffic flow" in interior design?

Traffic flow is how people move through a room, and it should be easy and unobstructed.

What is minimalism in interior design?

Minimalism is a style that uses clean lines, simple colors, and minimal decor.

Why is it essential to choose the right paint finish in interior design?

The paint finish affects how the paint looks and how it can be cleaned.

What is symmetry in interior design?

Symmetry is when elements on one side of a room mirror those on the other side.

Why is it important to consider the age and needs of the people who will use a space in interior design?

Design should be tailored to the specific needs of the occupants for comfort and safety.

What is fashion design?

Fashion design is the art of creating clothing and accessories.

What is a fashion designer?

A fashion designer is a person who creates clothing and fashion accessories.

What is a fashion sketch?

A fashion sketch is a drawing of a clothing design.

What is a fashion collection?

A fashion collection is a group of clothing designs created by a designer for a specific season or theme.

What is a fashion trend?

A fashion trend is a popular style or look that many people follow.

What does "haute couture" mean in fashion design?

Haute couture refers to high-fashion clothing that is custom-made and of high quality.

What is a fashion runway show?

A fashion runway show is an event where models walk down a runway wearing new fashion designs.

What is a fashion mood board?

A fashion mood board is a collage of images, fabrics, and colors that inspire a clothing collection.

What is the purpose of a sewing pattern in fashion design?

A sewing pattern provides instructions and templates for making clothing.

What is a fashion prototype?

A fashion prototype is a sample of a clothing design made to test and refine the design.

Why is fabric selection essential in fashion design?

The choice of fabric affects how a garment looks and feels.

What are the primary colors in fashion design?

Red, blue, and yellow are the primary colors that can be mixed to create all other colors.

What is fashion merchandising?

Fashion merchandising involves buying and selling clothing and accessories in the fashion industry.

What is the importance of body measurements in fashion design?

Accurate body measurements help in creating clothing that fits well.

What is a fashion trendsetter?

A fashion trendsetter is someone who sets new fashion styles that others follow.

What is a fashion portfolio?

A fashion portfolio is a collection of a designer's best work to showcase their skills.

What are fashion accessories?

Fashion accessories are items like belts, scarves, and jewelry that complement clothing.

Why is it essential to consider seasons in fashion design?

Different seasons require different clothing styles due to weather changes.

What is sustainable fashion?

Sustainable fashion promotes clothing and practices that are environmentally friendly.

What is a fashion label?

A fashion label is a brand or company that designs and sells clothing.

What is draping in fashion design?

Draping involves creating clothing patterns by pinning fabric directly onto a dress form.

What is a fashion seam?

A seam is a line where two pieces of fabric are sewn together.

Why is color theory important in fashion design?

Color theory helps designers choose colors that work well together and convey the desired message.

What is fashion branding?

Fashion branding is the process of creating a unique identity and image for a fashion label.

What are fashion trends influenced by?

Fashion trends can be influenced by culture, technology, music, and historical events.

What is the purpose of fashion magazines in the industry?

Fashion magazines showcase new trends, designs, and styles in the fashion world.

What is fashion styling?

Fashion styling involves putting together clothing and accessories to create a fashionable look.

What is the fashion capital of the world?

Paris, Milan, and New York City are known as fashion capitals.

What is fashion marketing?

Fashion marketing involves promoting and selling clothing and accessories.

What is a fashion trend report?

A fashion trend report predicts upcoming fashion trends based on market research.

What is the purpose of fashion retail displays?

Fashion retail displays showcase clothing and entice customers to make purchases.

What is the role of a fashion buyer?

A fashion buyer selects and purchases clothing and accessories for a store or brand.

What is the difference between haute couture and ready-to-wear fashion?

Haute couture is custom-made, while ready-to-wear is mass-produced and available in stores.

What is the fashion design process?

The fashion design process involves idea generation, sketching, pattern making, sewing, and finishing.

What is the role of a fashion showroom in merchandising?

A fashion showroom is a space where buyers can view and order clothing and accessories.

Why do fashion merchandisers use sales forecasting?

Sales forecasting helps predict future demand for fashion products.

What is the purpose of a merchandise plan?

A merchandise plan outlines what products to buy and when to buy them.

What is inventory management in fashion merchandising?

Inventory management involves keeping track of and controlling the stock of fashion products.

What is the difference between wholesale and retail prices?

Wholesale prices are the prices paid by retailers to suppliers, while retail prices are what customers pay.

What is the purpose of a purchase order in fashion merchandising?

A purchase order is a document that formalizes the purchase of fashion products.

What is markdown pricing in retail?

Markdown pricing involves reducing the price of unsold merchandise to encourage sales.

What is a fashion showroom sample sale?

A sample sale is an event where fashion items used in showrooms are sold to the public at a discount.

What is a fashion line sheet?

A line sheet is a document that provides product details to buyers, including images and prices.

Why is it important to understand your target audience in fashion merchandising?

Understanding your audience helps you select products that appeal to them.

What are point-of-sale systems in retail?

Point-of-sale systems are computerized systems used to complete sales transactions.

What is an inventory turnover rate in fashion retail?

Inventory turnover rate measures how quickly products are sold and replaced with new stock.

Why is it important to build relationships with suppliers in fashion merchandising?

Good supplier relationships ensure a reliable source of quality products.

What is the significance of product placement in fashion stores?

Product placement ensures that items are displayed where customers can easily find and buy them.

What is a market segment in fashion marketing?

A market segment is a specific group of consumers with similar preferences and needs.

What are the basic necessities of a home?

Shelter, safety, and a sense of belonging.

What is the difference between a house and an apartment?

A house is a standalone structure, while an apartment is part of a larger building with multiple units.

What is a mortgage?

A mortgage is a loan used to purchase a home, with the home itself serving as collateral.

What is a landlord?

A landlord is a person who owns a property and rents it to tenants.

What is rent?

Rent is the money paid by tenants to their landlord for the use of a property.

What are utilities in a home?

Utilities are services like electricity, water, and gas needed for daily living.

What is the purpose of a lease agreement?

A lease agreement is a legal contract that outlines the terms and conditions of renting a property.

What are the advantages of owning a home?

Ownership allows you to build equity and personalize your living space.

What are the advantages of renting a home?

Renting offers flexibility, less responsibility for maintenance, and no long-term commitment.

What is a down payment when buying a home?

A down payment is a portion of the home's purchase price paid upfront by the buyer.

What are the important factors to consider when choosing a neighborhood?

Safety, schools, proximity to work, and amenities like parks and stores.

What does "property tax" mean?

Property tax is a tax paid by property owners to support local government services.

What is a homeowner's association (HOA)?

An HOA is an organization that sets and enforces rules for a community or housing development.

What is a landlord's responsibility in a rental property?

A landlord is responsible for maintaining the property and addressing tenant concerns.

What is a tenant's responsibility in a rental property?

Tenants are responsible for paying rent on time and keeping the property in good condition.

What is a home inspection?

A home inspection is a thorough examination of a property's condition before buying or renting.

What is "home equity"?

Home equity is the difference between the market value of a home and the remaining mortgage balance.

Why is home maintenance important?

Regular maintenance keeps a home safe, comfortable, and in good condition.

What is the purpose of homeowner's insurance?

Homeowner's insurance protects against damage, theft, and liability in case of accidents on the property.

What are some common home safety precautions?

Installing smoke detectors, carbon monoxide detectors, and having a fire escape plan.

What is a budget, and why is it important for homeowners and renters?

A budget is a financial plan that helps manage expenses related to housing and other needs.

What are some ways to save energy and reduce utility bills in a home?

Turning off lights when not in use, sealing drafts, and using energy-efficient appliances.

What is "curb appeal" in real estate?

Curb appeal refers to a home's exterior attractiveness and its first impression on potential buyers.

What is a condominium (condo)?

A condo is a type of housing where residents own their individual units but share common areas and expenses.

What is a townhouse?

A townhouse is a multi-story home that shares walls with neighboring units.

What are some common features of a single-family home?

A single-family home typically has a yard and is not attached to other dwellings.

What is a home appraisal?

A home appraisal is an evaluation of a property's value by a qualified appraiser.

What are some common home maintenance tasks?

Cleaning gutters, changing air filters, and inspecting for leaks or damage.

What is the difference between a studio apartment and a one-bedroom apartment?

A studio apartment has one main room for living and sleeping, while a one-bedroom apartment has a separate bedroom.

What is a co-op (cooperative housing)?

A co-op is a type of housing where residents own shares in a corporation that owns the property.

What is a duplex?

A duplex is a house divided into two separate living units, often with separate entrances.

Why is it important to have good neighbors?

Good neighbors can enhance your quality of life and contribute to a safe and friendly community.

What is the role of a Homeowners' Association (HOA) in a neighborhood?

An HOA sets rules and standards for a community and manages common areas and services.

What is a rental application?

A rental application is a form that potential tenants fill out to provide information to landlords.

What is a security deposit in a rental agreement?

A security deposit is money paid by a tenant to cover potential damages or unpaid rent.

What is a lease term?

A lease term is the duration of a rental agreement, often 12 months.

What is the Fair Housing Act, and why is it important?

The Fair Housing Act is a law that prohibits discrimination in housing based on race, color, religion, sex, and other factors.

What is universal design in housing and interior design?

Universal design is the practice of creating spaces and products that are accessible and usable by people of all ages and abilities without requiring special adaptations.

What is the purpose of a seam allowance in sewing?

A seam allowance is the space between the edge of the fabric and the stitching line that allows fabric pieces to be sewn together securely.

What is the difference between renewable and nonrenewable building materials?

Renewable materials can be naturally replaced over time, such as bamboo, while nonrenewable materials, such as concrete or certain metals, cannot be replaced quickly once used.

What is visual merchandising in the fashion industry?

Visual merchandising is the strategic display of products in a retail store to attract customers, highlight merchandise, and encourage sales.

Why is scale and proportion important in interior design?

Scale and proportion ensure that furniture, décor, and architectural elements are appropriately sized in relation to each other and the space, creating a balanced and functional room.

Consumer Economics & Financial Literacy

What is consumer economics?

Consumer economics is the study of how individuals and households make decisions about spending and saving money.

What is a budget?

A budget is a plan that helps you manage your money by tracking income and expenses.

Why is it important to create a budget?

Creating a budget helps you control spending, save for goals, and avoid debt.

What is income?

Income is the money you earn, such as from a job or allowance.

What are expenses?

Expenses are the costs of living, including bills, groceries, and entertainment.

What is the difference between fixed and variable expenses?

Fixed expenses stay the same each month (e.g., rent), while variable expenses can change (e.g., groceries).

What is a savings account?

A savings account is a bank account where you can deposit money to earn interest and save for the future.

What is interest?

Interest is the money a bank pays you for keeping your savings in an account.

What is a checking account?

A checking account is a bank account used for everyday spending and bill payments.

What is a credit card?

A credit card allows you to borrow money to make purchases, which you must repay later.

What is a debit card?

A debit card allows you to spend money from your checking account.

What is a credit score?

A credit score is a number that reflects your creditworthiness and how likely you are to repay loans.

Why is it important to build good credit?

Good credit makes it easier to qualify for loans and lower interest rates.

What is a loan?

A loan is money borrowed from a bank or lender that must be repaid with interest.

What is a down payment when buying something on credit?

A down payment is an initial payment made when buying something on credit to reduce the loan amount.

What is an interest rate?

An interest rate is the percentage of the loan amount charged as interest.

What is a savings goal?

A savings goal is a specific amount of money you aim to save for a particular purpose.

What is an emergency fund?

An emergency fund is savings set aside for unexpected expenses like medical bills or car repairs.

What is the difference between needs and wants in budgeting?

Needs are essential things you must have (e.g., food, shelter), while wants are things you desire but are not necessary.

What is inflation?

Inflation is the increase in the prices of goods and services over time, reducing the purchasing power of money.

What is a paycheck?

A paycheck is a payment received from an employer for work done.

What is a tax?

A tax is money paid to the government to fund public services like schools and roads.

What is a sales tax?

A sales tax is a percentage added to the price of goods and services when you make a purchase.

What is the importance of comparison shopping?

Comparison shopping helps you find the best value for your money by comparing prices and quality.

What is a warranty?

A warranty is a promise by a manufacturer or seller to repair or replace a faulty product.

What is a refund policy?

A refund policy outlines the conditions under which you can return a product and get your money back.

What is a consumer complaint?

A consumer complaint is a statement expressing dissatisfaction with a product or service.

What is the Better Business Bureau (BBB)?

The BBB is an organization that helps consumers resolve disputes with businesses.

What is identity theft?

Identity theft is when someone steals personal information to commit fraud or theft.

What are some ways to protect against identity theft?

Safeguard personal information, use strong passwords, and monitor financial statements.

What is a refund policy?

A refund policy outlines the conditions under which you can return a product and get your money back.

What is a warranty?

A warranty is a promise by a manufacturer or seller to repair or replace a faulty product.
