

Webspark 2 release notes - v. 2.2.0

2021-11-01

Manual configurations update required for WYSIWYG tables

Addressing WS2-796 and WS2-798

WS2-796 - Allow table column resizing in WYSIWYG

WS2-798 - Allow merge and split for table cells in WYSIWYG

To fix the above issues in a safe manner without the danger of an automated update overwriting any text format configurations you may have made in your site, we ask you to please take the following actions:

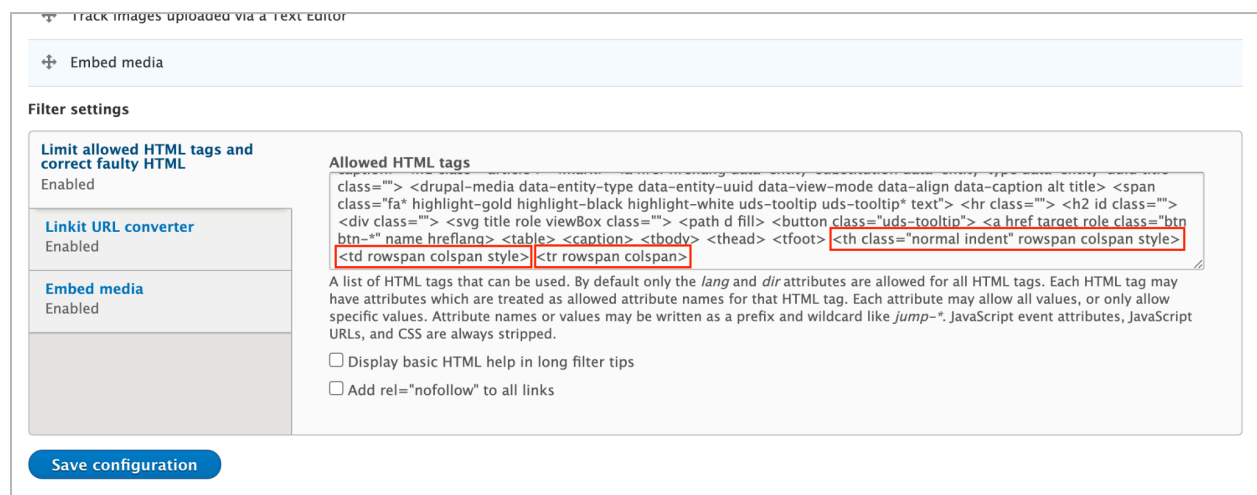

In your site, visit the following path

/admin/config/content/formats/manage/basic_html?destination=/admin/config/content/formats

Steps

1. Add the style attribute to the td and th tags in the **Allowed HTML tags** field to address WS2-796.
2. Add the colspan and rowspan attributes to the td, th and tr tags in the **Allowed HTML tags** to address WS2-798.

Example screenshot of what it might look like when you are done making these updates:

Allowed HTML tags

class=""> <drupal-media data-entity-type data-entity-uuid data-view-mode data-align data-caption alt title> <div class=""> <svg title role viewBox class=""> <path d fill> <button class=""> <a href target role class=""> <td colspan style=""> <tr colspan style=""> <th colspan style=""> <td rowspan style=""> <tr rowspan style=""> <th rowspan style="">

A list of HTML tags that can be used. By default only the *lang* and *dir* attributes are allowed for all HTML tags. Each HTML tag may have attributes which are treated as allowed attribute names for that HTML tag. Each attribute may allow all values, or only allow specific values. Attribute names or values may be written as a prefix and wildcard like *jump-**. JavaScript event attributes, JavaScript URLs, and CSS are always stripped.

☐ Display basic HTML help in long filter tips

☐ Add rel="nofollow" to all links
