This is an example of the governance snapshots sequence that could define the compensation amounts and the way that compensation would be distributed to the affected users of the “all other assets” category:

1. What model should be used for BTC that is used for compensation?
   a. remBTC (an ibBTC/sBTC LP Sett that affected users can only withdraw from, sacrificing the share of the future inflows that go exclusively to the Sett)
   b. emptyBTC (an airdrop of ibBTC/sBTC Sett tokens, and an accounting token for the future inflows)

2. How the initial compensation funds should be distributed?
   a. Buy 50% BTC and 50% Badger
   b. Buy 100% BTC

3. How much Stablecoins from the runway allocation should be used to buy compensation funds?
   a. 0 $M
   b. 2.5 $M
   c. 5 $M
   d. 7.5 $M
   e. 10 $M
   f. 12.5 $M
   g. 15 $M

4. Should the BTC funds allocated to Badger/WBTC TCL be used as compensation funds?
   a. Keep the TCL intact (keep all the earmarked treasury BTC allocated to it)
   b. Pull 20.41 BTC from the 0.0000078-0.0000156 range
   c. Pull 49.28 BTC from the 0.0000078-0.0000313 range
   d. Pull 45.05 BTC from the 0.0000078-0.0000625 range.

5. Should the compensation tokens be distributed evenly based on the pro-rata holdings of the affected users?
    a. Yes
    b. No (use a different distribution model)

6. If a portion of Badger emissions would be distributed pro-rata, should remBadger model be used?
    a. Yes
    b. No

7. What should the Boosted / Pro-rata split of Badger emissions that get directed to the affected users' vault be?
    a. 100% Boosted
    b. 75% Boosted / 25% Pro-rata
    c. 50% Boosted / 50% Pro-rata
    d. 25% Boosted / 75% Pro-rata
    e. 100% Pro-rata

8. What should be the emissions schedule of Badger distribution to the affected users' vault?

9. Should the DAO launch a treasury farming product, where Badger from the longer-term emissions schedule is used as collateral to leverage farm loaned Stablecoins?
    a. Yes
    b. No

10. What should be the percentage of the token revenue from the Stablecoin leveraged farming strategy to distribute to the affected users' vault?
    a. 100%
    b. 75%
    c. 50%
    d. 25%

e. 0%

11. Should the DAO launch Stablecoin Setts products

    a. Yes
    b. No

12. What should the % of the performance fees from the Stablecoin Setts be directed to the affected users' vault?

    a. 100%
    b. 75%
    c. 50%
    d. 25%
    e. 0%

13. (If the DAO launches the Citadel product, what would be the premium rate for accepting the affected users BTC tokens? Applicable if remBTC is the preferred choice in (1))
