Value List for Cosmetics

Created and managed by the Official Fisch Value Team

Terms to be familiar with:

O/C = Owner's Choice (Owner can decide how much to sell their item for, within reason. Remember that O/C does NOT automatically mean a high value.)

C/C = Collector's Choice (Collectors can decide how much they would like to spend on your item. This applies to cosmetics that are usually obscure or not particularly sought after enough to hold substantial value.)

TBD = To Be Determined (Value is yet to be determined, or incapable of evaluating, so it has no set value. It is advised to follow the recent trades including TBD items to evaluate the value you want.)

Value List Team:

Please DM [@adxmfd](#), [@zomblea](#), [@socie](#), or any of the Senior VLT for inquiries regarding this value list.

Boats

Boats

Below are the tiers of our boat cosmetics. Each boat will be accompanied with their value, demand, and status. You may find a visual of this tier list attached at the bottom of this tab.

Value: *The value of each boat is calculated in nessies, meaning the number next to the value is how many nessies it can pull / it is worth.*

Demand: *The demand of each boat is calculated on how sought after the boat is. If many people are looking to trade for it, it has a greater demand.*

Status: *The status of each boat is calculated on how well it is doing in the trading economy. Is it valuable? Is it wanted? Is the demand or value dropping?*
