

193320- Nelnet, Inc.

Accessibility Evaluation:

Professional services for an accessibility evaluation typically involve manual and automated auditing of a digital product (like a website or app) against established standards, such as WCAG. This results in a detailed report identifying accessibility issues and providing actionable recommendations for remediation and compliance. This differs from "remediation" which provides a "fix" rather than an evaluation.

Ordering Information:

Vendor: Nelnet, Inc.
