Special Topics Description

GLBH 100. Special Topics in Global Health: "Water, Sanitation, and Hygiene in Global Health"

Instructor: Georgia Kayser

This course provides an overview of water, sanitation and hygiene (WaSH) in global health. Inadequate WaSH are responsible for a substantive portion of the global burden of disease, especially for children under five years of age. This course will survey the state of WaSH in low, middle and high-income countries. It will then introduce the range of WaSH technologies available to improve global health and examine the social, economic, and policy considerations important in WaSH planning. Students will learn the challenges and opportunities related to sustainability and equity in the provision of WaSH services, how to carry out a simple field test for water safety, and methods for monitoring and evaluating WaSH services. Taught by an instructor with over 15 years of field experience in WaSH in global health, the course will offer case studies from South Asia, the Americas, and sub-Saharan Africa.

How to submit an undergraduate petition:

For Pre-Approved Courses:

If you are taking a course that is offered "by petition" it will not automatically show up your degree audit.

You will need to a paper [submit a petition](#) or send a message in the Virtual Advising Center asking for the following:

"Please accept _____, a Global Health Pre-Approved Course, towards _____ requirements for my Global Health _____ (Major/Minor)."

For Transfer, Study Abroad and non-pre-approved courses:

- Complete the [online petition form here](#).
