

STARRY NIGHT

By VAN GOGH

Vicent Van Gogh was born in the Netherlands on the 30th March of 1853 and he died on the 29th July of 1890. He studied in Paris with Cormon and he met Pissarro, Monet and Gauguin. Van Gogh pursued him with a open razor, was stopped by Gauguin, but ended and cutting a portion of his own ear lobe off.

This painting is 122 years old. In this painting, there are some houses with a church in the middle. There is also a small mountain range and in the sky there are many stars with the moon on the right . On the left of the painting there are some bushes and one of them is very long.

I like this painting because it's got many colours.
