

Call for Data Collection Volunteers

Orodata Science is pleased to launch a critical initiative to promote public health and improve healthcare data and services in our communities. To accomplish this, we seek dedicated and passionate individuals to join us as Data Collection Volunteers. By volunteering your time and effort, you can contribute to generating credible, valuable data that will help shape better healthcare policies and practices in selected Primary Health Care centres in six (6) selected states in Nigeria.

About the Program:

The Data Collection Volunteer Program is integral to our mission to enhance primary healthcare centres' effectiveness across the selected six states. As a volunteer, you will have the opportunity to work closely with healthcare professionals, collect essential data, and gain valuable insights into public health challenges and opportunities. Your efforts will directly impact the lives of individuals in your community, making a difference in their well-being.

Volunteer Responsibilities:

- He/She will be visiting designated primary health centres within the selected community.
- He/She will be Conducting surveys and gathering data from patients and healthcare providers.
- He/She will be ensuring accurate and reliable data collection through careful documentation.
- He/She will be collaborating with other volunteers and healthcare staff to achieve program goals.
- He/She will be adhering to ethical standards and maintaining the confidentiality of sensitive information.

Qualifications:

- Be Nigerian citizens or legal residents.
- Passion for public health, Data and a genuine interest in community well-being.
- Strong communication and interpersonal skills.
- Ability to follow guidelines and work independently.
- Prior experience in data collection or healthcare settings (preferred but not required).
- Must be 21 years of age as of 1st of August 2023, enthusiastic, and reliable.
- Have an Android mobile phone with a minimum of 1GB RAM | 10GB Memory.
