INTERESTS

Builder with experience across AI agents, AI video generation, freelance web development, and SEO. Actively experimenting with AI to build and test real-world solutions.

EDUCATION

University of Mumbai - Fr. C. Rodrigues Institute of Technology (FCRIT) **May 2025**
Bachelor of Engineering in Information Technology (7.4 cgpa) *Mumbai, India*

- Selected coursework: Object Oriented Programming, Web dev., DBMS, Computer Networks, Operating Systems, Data Structures, Artificial intelligence & data science.

Shubham Raje Jr. College – Maharashtra Board for Higher Secondary Education **May 2021**
High School (92.4 percentage) *Mumbai, India*

- Clubs: Athletics - District level, Chess, Environment Club, Asst. Monitor.

Experience

AI Product Manager Intern | *Karta AI* **Jul 2026 - Current**

- Designed and optimized inbound customer support and outbound retention voice AI agents by defining prompt logic, conversation flows, authentication, DTMF handling, and SOP-driven workflows.
- Led product validation through call analysis, ASR tuning, multilingual testing, and prompt iterations, while pitching a voice AI POC to a client that was approved for implementation.

Growth intern | *Composio* | [Repo](#) **Nov 2025 - Feb 2026**

- Researched emerging AI and developer trends to identify high-impact agent use cases and build.
- Designed and built **6 AI agents** on Composio since Dec 2025, driving **50+ unique GitHub clones** combined and my single repo has over 20+ stars organically.
- Published an **AI-generated [YouTube demo/explainer](#)** showcasing real-world use cases, achieving **231+ views**.

Founders Office | *TDD* | [My work](#) (Experiment) **June - July 2025**

- My work was around social media, generating 10,000+ views across multiple client instagram handles with the help of video editing, graphic design and posts.

Projects

Bolna-Aid | *Voice AI Agent* | [Visit website](#) **June 2026**

- Built Bolna-Aid, a voice-first AI copilot for ER triage nurses to check protocols, verify drug safety, and document care, all hands-free using the [Bolna AI](#) API.

MnemonicsAi | *NextJs* | [Visit website](#) **Nov - Dec 2024**

- Developed a full-stack web application leveraging Next.js for both server-side rendering and client-side functionality. I used supabase in the backend and interfaced with the Gemini API.

SoBoards | *Nextjs* | [Visit Website](#) (Experiment) **Dec - Mar 2025**

- Built a client-facing website with [blogs](#) and [reels](#) on outdoor ad storytelling; earlier versions used a [CI/CD-inspired](#) workflow for stable updates.

Leadership Experience/ Extra-Curricular

Freelancing **May 2026**

- I started with building [websites](#) as freelancing project and recently I built AD image generation pipeline at get-ryze startup.

Hackathon | *win* |

- Participated in 8 hackathons winning in 3. Dec 2025 we built a eleven labs competitor [voicevault](#) in a 24hr hackathon and won a runner up, \$1.5k distributed among 4 team members. [AR board game](#) in SwiftUI + RealityKit, optimised for 25MB with offline functionality on Swift Playgrounds (iPad).

SKILLS

Frontend: React.js, Next.js, HTML5, CSS3
DevOps & Cloud: Docker, Git, AWS (EKS)

Languages: JavaScript, TypeScript, Swift
Tools: Claude code, heygen, cursor, VN
