

Subject: **Apply for engineering internship**

Hi Vonda Team,

My name is Mehroz, and I am currently doing a programming course at Code Your Future, where I have been working on weekly sprints to complete coursework exercises, including writing and testing code in JavaScript. Furthermore, I also have prior experience of working in Android development using Java and XML.

I want to become a software developer because I love to develop software that can provide a solution to some existing problem or improve someone's life. And I see myself as an owner of my own software company that will provide exciting products for the people.

If Vonda gives me an opportunity to work as an intern, I will utilize all my skills and knowledge to learn as fast as I can about the company and its work, and then create an impact to any extent through my work and energy.
