mySwap & AVNU Starknet Daily Task

State: Ongoing, Chain: Starknet, Wallet: Argent X, Timeline: Instant, Type: Active

 More volume on Starknet protocols

- Go to <https://app.myswap.xyz/#/swap>
- Swap most of your ETH -> STRK
- Go to <https://app.avnu.fi/en>
- Swap back STRK -> ETH

++ I recommend interacting with AVNU outside daily tasks

 Be aware that transactions on Starknet are slow 

 Write down why wrapped tokens like WETH, WBTC etc. are useful and what they are

Also take the actions described in the pinned message.

All Berachain tasks will be on bArtio from now on. This also means all older Berachain tasks are outdated.

If you haven't used bArtio, visit BEX <https://bartio.bex.berachain.com/> and connect your wallet to add the network.

Here are the bArtio faucets:

****Free****

- <https://www.faucet.kodiak.finance/> <- only works if you have less than 0.05 BERA (NOT VPN-friendly)
- <https://faucet.trade/berachain-testnet-bera-faucet> <- requires you to tweet your address (ALREADY DID THIS - not making multiple twitter accounts)

*****Paid*****

- <https://bartio.faucet.berachain.com/> <- requires 0.001 (~\$4) on Ethereum mainnet (Use VPN to avoid 8 hour lockout)
- <https://faucet.quicknode.com/berachain/bartio> <- requires 0.001 (~\$4) on Ethereum mainnet (NEED TRANSACTION HISTORY OR IT WONT WORK)
- <https://faucet.0xhoneyjar.xyz/> <- requires you to complete quests for badges and 0.001 (~\$4) on

Ethereum mainnet

- <https://faucet.morkie.xyz/bera> <- requires Morkie passport (costs 5 MATIC to mint ~3\$) - I only have a passport for Air-1; work on getting passports for the other accounts, too. NEED MATIC (Polygon)

How to access the "paid" faucets:

- Currently, most of the good Berachain faucets require you to hold 0.001 ETH (\$4) on the Ethereum mainnet.
- To get 0.001 ETH on the Ethereum mainnet, I recommend you transfer directly from a CEX to your farming address.
- Most importantly, ****only do this while gas is at its daily low****.
- Also, make sure the amount you receive at your address is at least 0.001.

State: Ongoing, Chain: BTC Testnet, Wallet: Unisat, Timeline: Instant, Type: Active

 Botanix is a lot overlooked, good time to interact with it

Step 1 (Chain + get funds)

- Go to this link: <https://faucet.botanixlabs.dev/>
- Click "add botanix testnet first" and approve the adding of the testnet, now switch to it
- Now click "get your funds"

Step 2 (Unisat)

- Install Unisat <https://unisat.io/>
- Switch to "TESTNET" from "LIVENET" + Segwit
- Get some funds for the testnet from here
<https://signetfaucet.com/>
<https://alt.signetfaucet.com/>
<https://signetfaucet.bublina.eu.org/>

Step 3 (Bridge)

- Go here: <https://bridge.botanixlabs.dev/>
- Click "generate deposit address"
- Click "copy" (the Bitcoin address) and send test BTC to this address from unisat address

Step 4 (Transactions) DISCLAIMER: THIS IS WRITTEN IN THE DOCS, SO THEY WILL NOT FILTER YOU OUT FOR DOING THIS

- Inside your MM wallet make a new account (click "account 1" then "add new account")
- Now go to account 1 (where you have your funds) and click "send"
- Now Send some money to account 2 in MM (doesn't matter the amount)

Step 5 (dApps)

- Go to: <https://avocadoswap.io/#/swap>
- With your account 1 swap for DOGE (or whatever you want)

Step 6 (Withdraw)

- Go here: <https://bridge.botanixlabs.dev/>
- Withdraw some funds from Botanix (MM) to Bitcoin testnet (Unisat)

 Let's start farming on SUI, most dapps there are tokenless.

DISCLAIMER

If you have low money DON'T DO THIS. Solana and starknet dapps farming is better...this is something more that you can do if you have some spare money and are already doing starknet and solana farming

- Install SUI wallet:

<https://chromewebstore.google.com/detail/sui-wallet/opcgpfmipidbgpenhmajoajpbobppdil>

- Make a new seed phrase for this

- Withdraw 60\$ of SUI to your SUI address (you can get SUI on big CEXs)

Injective Daily Task

State: Ongoing, Chain: Injective, Wallet: Keplr, Timeline: 2024

 Some might have missed this, so let's stake INJ again.

 If you already did this you are FINE for today, YOU DON'T NEED TO DO THIS AGAIN 

Edit:  Tokens should be staked for a while. This means you can't just stake for a day then leave like with other plays. If you have little money and you can't afford to lock \$50 then only do the rest of the daily tasks. 

Step 1: Download Keplr: <https://www.keplr.app/download> and download Keplr wallet on your browser

Step 2: Buy 50\$ of INJ on any CEX (Binance, Bybit, Coinbase) and withdraw it to your Keplr address on INJ Chain:

Step 3: In you wallet click "stake" then type "Talis" and stake 0.5 INJ for Talis Validator

Step 4: Click "stake" and type "BlackPanther" and stake 0.5 INJ for BlackPanther Validator

 Write down what is the price impact and why it's important, do that on a google document and share it (put "everyone with the link can view")
