

\* (gwiazdka) przy nazwie oznacza domieszkę innego koloru

**Podane wysokości są maksymalnymi, jakie może osiągnąć dana jeżówka wg znalezionych w internecie opisów katalogowych. W zależności od warunków jeżówki mogą znacznie odbiegać wysokością od podanych wartości.**

*W przypadku, gdy nie znajdziesz jakiejś odmiany w poniższym zestawieniu proszę o zostawienie komentarza - w miarę możliwości będę uzupełniać tabelę o kolejne odmiany.*

|              | 35cm           | 40cm                                                                                            | 50cm                                                                                                                                                                                                       | 60cm                                                                                                                                                                                                                                                                                       | 70cm                                                                                                 | 80cm                                                                                          | 90cm                                       | 100cm         |
