

I _____ (parent or guardian) of _____ (student athlete) understand:

In the event a student-athlete is injured and needs medical attention, he/she will receive an insurance claim form from the school's athletic trainer. School insurance shall serve as secondary insurance after the parents' primary insurance provider is submitted. It should not be implied or stated that secondary insurance will cover all medical costs left over from primary insurance.

Although some claims may be covered completely, most will require payment from parents as well. Please have the Medical Office where you seek services for your injury make a copy of the completed form for your records. If the head coach or athletic trainer is unaware that an athlete sought medical attention after a practice or game, it is the student-athlete's responsibility to ask the head coach or athletic trainer for the appropriate insurance claim form.
