

Job Title: Mobile App Engineer Intern (React Native)

- **Location:** Remote / Hybrid (Bengaluru, India)
- **Duration:** 3–6 months (with potential for full-time conversion)
- **Stipend:** Unpaid
- **Reports to:** Lead Engineer

About Us

We are building a buyer-seller marketplace – a trusted, curated platform for unique pre-owned goods. Backed by industry veterans who have scaled successful tech companies, we are a fast-moving startup using cutting-edge technology. You won't just be an intern here – you'll ship real code, learn from leaders, and help shape production systems from Day 1.

Role Overview

We are looking for a creative and detail-oriented Mobile App Engineer Intern who cares about pixels, polish, and performance. You will work directly with our Lead Mobile Engineer to build a high-quality React Native app from the ground up. You'll own screens, navigation, theming, and API integration – all while learning how to ship a production-grade mobile experience.

Tech Stack You'll Learn & Work With

Framework: React Native (Expo or Bare)

Language: TypeScript / JavaScript

Styling: Tailwind CSS (NativeWind), StyleSheet, CSS-in-JS

Navigation: React Navigation

State Management: Zustand / TanStack Query

Backend Integration: REST APIs, GraphQL (Apollo)

UI Components: React Native Paper / NativeBase / Custom Components

Forms & Validation: React Hook Form, Zod

Analytics & Monitoring: Firebase, Sentry

Publishing: App Store Connect, Google Play Console

Nice-to-Have (Web): React.js (For Admin Dashboard / Web views)

What You'll Do

- Build and ship screens for product listings, user profiles, checkout, and order tracking.
- Implement smooth navigation and tab/modal flows using React Navigation.
- Write reusable, responsive UI components with Tailwind CSS (NativeWind) or StyleSheet.
- Integrate Mobile App with our backend APIs (login, product search, transactions).
- Handle offline caching, push notifications, and deep linking.
- Optimize app performance – reduce re-renders, manage images, improve load times.
- Work on OTP login screens.
- Collaborate on payment UI flows.
- Document components, setup guides, and learnings.
- (Nice-to-have) Contribute to a React.js based admin panel or web companion app.

What We're Looking For

Must-Have:

- Pursuing or completed Bachelor's in CS/IT related field.
- Basic understanding of React Native (you've built at least one small app – college project counts).
- Good knowledge of CSS / styling – flexbox, layouts, responsiveness, and visual polish.
- Familiarity with JavaScript (ES6+), Typescript, async/await, and components/props.
- Know how to call REST APIs (fetch or axios) and handle loading/error states.
- Hunger to learn, ask questions, and ship quickly.
- Self-discipline to work in a remote/flexible setup.

Good to Have:

- Familiarity with Tailwind CSS (NativeWind) or any utility-first CSS framework.
- Exposure to React.js (web) – even a small personal project.
- A GitHub profile with mobile or frontend code (college projects, hackathons, or freelance work).
- Basic understanding of app store deployment (iOS/Android).
- Eye for UI/UX – you notice when a button is 2px off.

What You'll Gain

-  Real-world startup experience – not coffee-fetching, real coding.
-  Mentorship from industry veterans – the founders have built and scaled companies.
-  Portfolio-ready work – your code will be in production (App Store + Play Store).

-  Path to full-time – high performers get a PPO (Pre-Placement Offer).
-  Learn the latest mobile stack – no outdated tech, no legacy codebases.
-  Remote-first culture – no commute, no forced timings.
-  Build something visually delightful – you'll own the look and feel of the app.

Work Timings & Mode (We're Flexible!)

We understand you may be a student, freelancer, or someone juggling multiple commitments. That's why we offer:

 Flexible Working Hours – No 9-to-9 grind. Work when you're most productive. Just sync up during core collaboration hours and meet weekly goals.

 Remote First – Work from home, a café, or a co-working space. As long as you have a stable internet connection, you're good.

 Hybrid Option – If you're in the same locality and prefer occasional in-person sessions (brainstorming, whiteboarding, or just chai), you're welcome.

 Async Culture – We document everything. Meetings are minimal and scheduled with notice.

 "We care about what you ship, not how many hours you sit at a desk."

Commitment to Inclusivity & Equal Opportunity

We are deeply committed to building an inclusive workplace where individuals from all walks of life feel a true sense of belonging. We welcome applications from people of all backgrounds, identities, and life experiences. All applicants are treated fairly and evaluated solely on talent, merit, and a passion for brand-building excellence—without regard to race, age, religion, sex, national origin, citizenship, gender identity, sexual orientation, disability, or any other protected characteristic.

Interested candidates can send their resume/portfolio at team@vyntage.shop.
