and Midwifery Council

Add Author Name here

Extended Abstract (Times New Roman 12 pt, bold)

At least 800 words. Contents should concisely describe the background introduction, objectives of the article, major content/issues included in the article, conclusion and recommendations.

It is suggested that the full- expanded form should be provided before providing the abbreviations, acronyms, or other shortened forms at first use.

Introduction

Objective(s)

Content or Case Report (Choose one that applicable)

Recommendation (recommendation for implication)

Keywords keyword 1/ keyword 2/ keyword 3/ keyword 4/ keyword 5

(List 5 words that capture the essence of your paper making it searchable. The keywords are written separately by slash (/), and no punctuation is used after the last keyword. Keywords must represent the content of the article and be specific to the issue of the article)

¹Author affiliations [list all author affiliations in the form of institution, city, state, country]

²Corresponding author, affiliations, email:

(The list of numbers here is changeable as appropriate)

Introduction

This section should describe significance of the problem/phenomenon/issues; review of relevant theory and empirical work; problem statement; and knowledge gaps of the sciences in a particular field should be addressed clearly in this part.

The Vancouver referencing system is required. All in-text citations are in superscript numerals following the punctuation. Abbreviations should be defined in full at their first instance.

Objective(s)

Content(s) including topic and sub-topic as appropriate

The Case Report (specific to case report)

Describe patient information, clinical findings, diagnosis, intervention, and outcome(s) The writer may change sub-title as appropriate.

Patient Information

Clinical Findings

Diagnosis

Intervention

Outcome(s)

Discussion (specific to case report) possible included: a scientific discussion of the strengths and limitations of associated with this case report; or discussion of the relevant medical literature with references; or the scientific rationale for any conclusions

Conclusion and Recommendation

Informed Consent (Did the patient give informed consent?)

Acknowledgement (optional)

References

(Vancouver referencing style as link below and should not exceed 30 references)
