

Undergraduate Funding Opportunities for CALS Students

Undergraduate Research Funding

Funding is available to undergraduate students for research expenses, including travel to a professional meeting or conference to present findings. Funding may not be used as a stipend for students conducting the research. Students are advised to work with faculty members to develop scientifically relevant and well-circumscribed research proposals. Access the [website](#) for details, including proposal development instructions, examples, and deadlines. Fall deadline is typically in late Sept/early Oct (look for email from CALS or check website).

The CALS Alumni Association Academic Enrichment Program

The CALS Alumni Association Academic Enrichment Program fosters the educational goals of Cornell's College of Agriculture and Life Sciences (CALS) undergraduate and graduate students by providing financial support for activities that complement and enhance each student's academic experience at Cornell and for which funding is often not available. The project which receives funding should advance the mission of the college and enhance the professional goals and academic experiences of each applicant.
