There are two setups: basic and advanced.

Basic

This setup is used for simple needs like amplifying a single speaker and/or using an iPod to play background music for an event.

Video tutorial

Inventory

Cables are found in milk crate

- 1 speaker (recommend the Yorkville because it has two inputs)
- 1 power cable for speaker
- 1 Shure microphone
- 1 XLR cable to connect microphone to speaker
- 1 1/8" minijack to XLR to connect iPod directly to speaker

Procedure

1. Ensure the speaker is turned off and output levels set to low
2. Connect all cables
3. Turn on speaker
4. Slowly raise output volume

Advanced

This setup requires advanced booking and permission from NetSquared Vancouver.

This setup is used when several inputs are used, like a panel event. We assume you know what you're doing in this case, but please get permission from NetSquared Vancouver before you book the full setup with the mixing board, both speakers, and all the other jazz.

You can reach us at eli@net2van.com or 604-719-1079

INVENTORY

Speakers

- 1- [Mackie TH-12A](#) 400 Watt powered speakers
- 1 - [Yorkville NX25P](#) with two XLR inputs
- 2 - speaker stands
