

ELA - Third Grade

Today we are again reading nonfiction text and looking for problems and solutions. Let's once again review how text structures can help us remember what we read.

What was the problem and solution? Find evidence in the text.

What is a prototype? How did you figure out what this word means?

Did this invention make Baltimore a better place to live - tell how.

Think of a problem in our city or state. Think of a list of solutions that could help solve the problem. Make a google slide or poster - on half illustrate the problem and on the other half - your solution or solutions.
