

Ferren Hamlet Application
By Jakethesnake8_8

Yellow - houses

Green - fields or yards

Brown - roads

EDIT: The hunter and furrier will be turned into a basket-maker and potter respectively. I couldn't find a way to edit the actual image because of how I made the plan originally.

A potential plan of the hamlet described as having between 5-7 houses. In the east part of the hamlet there is probably room for more fields as well as fields snaking along the road of the valley as shown in the diagram below. As for the house style it would be not too dissimilar from the current central westerlands

style.
