

Why Is My File Taking a Long Time to Turn In?

When uploading a large file, it may take some time to load fully in Google Classroom. Here are a few common reasons:

- **File Size:** Larger files, like high-resolution images, long videos, or complex Adobe project files, can take longer to upload.
 - **Internet Speed:** A slow or weak internet connection may slow down the upload process.
 - **Device Performance:** If your computer is running a lot of programs, it may affect the upload speed.
-

Tips to Help Your Upload

1. **Be Patient**
 - Larger files may take a few minutes to load fully, so give it some time to process. Avoid clicking multiple times, as this can slow things down further.
 2. **Refresh the Page if Needed**
 - If the upload seems stuck, try **refreshing the Google Classroom page**:
 - Click the **refresh button** at the top of Chrome or press **Command + R** on your keyboard.
 - Once the page refreshes, try uploading your file again. This often helps reset the upload and resolves common issues.
 3. **Try Uploading at a Different Time**
 - If your upload is taking too long, you may want to try again during off-peak hours (early morning or later evening) when there's less online traffic.
-

By following these steps and giving your upload a bit of time, you'll likely be able to submit your file successfully!
