

Kate Wilson is a Senior Fellow at People-Centered Internet. Kate believes that every person should have access to life enhancing services made possible through digital. She has dedicated her career to make this vision a reality by supporting countries that seek to accelerate their national digital transformation efforts.

As a Senior Fellow at PCI, Kate shares perspectives from decades of working closely with national leaders who are charting their national digital journeys. Prior to joining PCI as a fellow, Kate founded the Digital Impact Alliance in February 2016 and led the organization as its CEO until January 2023. Before DIAL, Kate co-founded and led the Digital Health Solutions Group at PATH, the Seattle-based international health organization for nine years. She has also worked in the commercial software sector at Microsoft and Intel, and worked on international trade issues at General Electric and the U.S.-ASEAN Council. Over the last three decades, Kate has led global projects in over thirty countries, working primarily in Africa and Asia.
