Limited Time Discount — Save 25% Instantly!

## **In Depth Training**

Recorded video training that guides you through the decision tree approach used in real trading, helping you learn how to adjust your trades.

## **Unlimited Email Support**

A dedicated support team ready to make sure you understand the concepts as you build the skills and confidence to apply them on your own.

## **Lifetime Access**

With lifetime access to all training modules, you can return anytime to refresh your knowledge and stay focused.

## **What This Course Gives You**

This program delivers a powerful set of trading rules and guidelines designed for real world application. At the core is the decision tree method that enables you to manage strategies effectively in any market direction.

In a rising market, you maximize profits. In a downturn, you mitigate losses. In a stagnant market, you generate cash flow. This flexibility allows you to tailor strategies to your needs, improving understanding and boosting trading confidence.

## **Why The Right Teacher Matters**

Choosing the right mentor is your competitive advantage. To achieve investing goals, you need to learn skills that become second nature and apply them in real practice. Noah Davidson and the team make complex concepts simple, practical, and clear. With experienced mentors guiding you, options trading becomes straightforward, effective, and engaging.

## **How This Course Transforms Your Trading**

The Ultimate Adjustment & Repair Playbook is a comprehensive guide to mastering five core trading strategies and learning how to adjust trades to minimize risk and maximize profits.

Built on the Four Pillars of Investing approach, the course introduces a powerful set of systematized rules and guidelines. The decision tree method equips you to manage each strategy effectively regardless of market direction.

## Your Core Strategies

### **Naked Puts**

Sell put options on stocks you are willing to buy at the strike price if they fall. This generates income and can allow you to acquire stocks you want at a discount.

### **Dynamic Stock — Protective Puts, Covered Calls, Collars, and Cash Flow Cycle**

Protect your stocks with puts, generate income with covered calls, and combine both in a collar strategy. Understand the cash flow cycle to optimize decisions.

### **Long Calls**

Buy call options when you anticipate a stock price increase. This strategy offers unlimited profit potential while limiting risk to the premium paid.

### **Long Puts**

Buy put options when expecting a stock price decline. This can be used as insurance to protect stock holdings.

### **Credit Spreads**

Enter spreads by buying and selling options of the same class, expiration date, but different strike prices. This generates income while limiting risk.

## By the End of the Course You Will

Master the five core strategies and apply them consistently in your trading.  
Use the decision tree approach to remain calm and confident in any market situation.  
Control your risk and protect your portfolio from large losses.  
Mitigate losses, preserve capital, and keep your portfolio growing.  
Boost your confidence with a solid understanding and a clear plan for adjusting trades.
