

# Create 1000 Uniswap Accounts Safely

---

If you're reading this document, it means you've realized a fundamental truth: Scaling in MMO Marketing cannot be achieved with a single account. Those earning 6-7 figures monthly all share one thing in common: They operate dozens, even hundreds of accounts simultaneously.

But here's the biggest challenge: How do you prevent Uniswap from discovering that all accounts are managed by one person? This is precisely why 90% of beginners fail within their first month.

## Platform Detection Methods

To understand why you need antideetect browser, see how Uniswap tracks you:

### **\*\*Layer 1: Network Fingerprinting\*\***

IP Address and Geolocation

DNS leak detection

WebRTC public IP exposure

Connection speed and latency patterns

### **\*\*Layer 2: Browser Fingerprinting\*\***

Canvas fingerprinting (99.9% unique)

WebGL vendor and renderer

AudioContext fingerprinting

Font enumeration (50+ fonts)

Screen resolution and color depth

Timezone and language settings

### **\*\*Layer 3: Behavioral Biometrics\*\***

Mouse movement patterns

Typing speed and rhythm

Scrolling behavior

Click patterns and timing

Session duration patterns

For Uniswap, matching 70%+ fingerprint is enough to link accounts. Antidetect browser is the only solution to isolate 100% of these factors.

### **The Solution: Antidetect Browser Technology**

**Multilogin** is the world's leading antidetect browser, trusted by tens of thousands of professionals in MMO Marketing. This isn't just a VPN or regular proxy - this is a COMPREHENSIVE solution to create completely independent browser profiles.

#### **Core Features:**

##### **\*\*1. Complete Fingerprint Isolation\*\***

Each browser profile has completely unique fingerprint:

Separate Canvas fingerprint

Different WebGL vendor/renderer

Customizable Timezone, Language, Geolocation

Individual Font list, Screen resolution

Independent Audio context fingerprint

##### **\*\*2. Real Browser Cores\*\***

Multilogin uses 2 browser engines:

**Mimic**: Based on Chromium (like Chrome)

**Stealthfox**: Based on Firefox

Not modified browsers that are easy to detect, but real browser cores with advanced spoofing.

##### **\*\*3. Selenium/Puppeteer Integration\*\***

Automation-friendly for those who need:

Bulk posting on Uniswap

Automated data scraping

Scheduled tasks

API-driven workflows

##### **\*\*4. Team Collaboration\*\***

Share profiles with team members

Role-based access control

Cloud sync profiles

Centralized management dashboard

### Case Study: Affiliate Network With 200+ Accounts

**Background**: David runs affiliate network, manages accounts for team members.

**Scale**: 200+ {platform} accounts across 10 team members.

**Previous Setup**: Each team member managed own accounts, inconsistent, 30% ban rate.

**New Setup With Multilogin**:

Multilogin Scale plan (1000 profiles)

Centralized management dashboard

Standard SOPs for all team members

Profile sharing and collaboration

**Impact**:

Ban rate decreased from 30% to 2%

Team productivity increased 3x

Onboard new members in 1 day (vs. 2 weeks)

Monthly revenue: \$180K+ stable

**Lesson**: \*At scale, consistency is everything. Multilogin allows standardizing processes across entire team.\*

### FAQ: Frequently Asked Questions

**Q**: Is Multilogin legal?

**A**: Completely legal. Multilogin is a tool for multi-account management, used by agencies, businesses, and marketers worldwide. However, users must comply with TOS of platforms they use.

**Q**: Do I need technical knowledge?

**A**: No. UI is very user-friendly. Profile setup takes 5-10 minutes. Detailed docs and tutorials available.

**\*\*Q: Compare with Gologin, Adspower?\***

A: Multilogin is premium in pricing but superior in technology and stability. In {niche}, lowest ban rate compared to competitors.

**\*\*Q: Do I need proxies?\***

A: Yes, highly recommended. Residential proxies (\$3-15/GB) are best for {platform}. Multilogin doesn't include proxies.

**\*\*Q: Refund policy?\***

A: 3-day money-back if not satisfied. No questions asked.

**\*\*Q: Update frequency?\***

A: Multilogin updates regularly following platform changes. Auto-update in app.

### **Start Today**

Every day you delay is a day:

Competitors are scaling while you're still struggling

Your accounts risk being banned anytime

Revenue potential limited by 1-2 accounts
